Executive Summary

Oryza is a sustainable Paraguayan business that produces practical and modern notebooks using agricultural and industrial waste. Our reusable notebook combines a rice-husk cover, sugarcane paper, and a disc-binding system that allows customers to remove, reorganize, and replace individual parts instead of purchasing a completely new notebook. It is designed mainly for secondary school and university students in Asunción and Gran Asunción who value practicality, personal style, and sustainability, as well as teachers and environmentally conscious consumers. We stand out from traditional notebook brands by offering a durable and customizable product that reduces waste and extends the notebook's useful life. Our team—Jazmin Pereira, Santiago Leiro, Joaquín Duarte, Melissa Verón, and Constanza Melgarejo—manages production, marketing, sales, finance, communication, and quality control. We will launch through Instagram, WhatsApp, school events, and local delivery or pickup, selling each notebook for Gs. 65,000. In one year, we aim to introduce the product successfully, build brand recognition, and create a loyal customer base. Within three years, we plan to expand production, offer more designs and sizes, and sell through selected bookstores and educational institutions. In five years, our goal is to become a recognized sustainable stationery brand in Paraguay and introduce other environmentally friendly school and office products. The initial investment will cover raw materials, disc-binding supplies, packaging, production tools, and promotional materials. By starting on a small scale, controlling costs, and reinvesting part of the profits, Oryza has the potential to become a profitable business while providing a useful and environmentally responsible alternative to conventional notebooks.

Resumen ejecutivo

Oryza es una empresa paraguaya sostenible que produce cuadernos prácticos y modernos utilizando residuos agrícolas e industriales. Nuestro cuaderno reutilizable combina una tapa elaborada con cáscara de arroz, hojas de papel de caña de azúcar y un sistema de encuadernación con discos que permite retirar, reorganizar y reemplazar sus partes sin necesidad de comprar un cuaderno completamente nuevo. Está dirigido principalmente a estudiantes de secundaria y universitarios de Asunción y Gran Asunción que valoran la practicidad, el diseño y la sostenibilidad, además de docentes y consumidores comprometidos con el cuidado del medioambiente. Nos diferenciamos de las marcas tradicionales al ofrecer un producto duradero y personalizable que reduce los residuos y prolonga su vida útil. Nuestro equipo, integrado por Jazmin Pereira, Santiago Leiro, Joaquín Duarte, Melissa Verón y Constanza Melgarejo, se encarga de la producción, el marketing, las ventas, las finanzas, la comunicación y el control de calidad. El lanzamiento se realizará mediante Instagram, WhatsApp, eventos escolares y entregas locales o retiros en puntos acordados, con un precio de Gs. 65.000 por cuaderno. Durante el primer año buscamos introducir exitosamente el producto, aumentar el reconocimiento de la marca y crear una base de clientes leales. En tres años planeamos ampliar la producción, ofrecer nuevos diseños y tamaños, y vender en librerías e instituciones educativas seleccionadas. En cinco años, nuestro objetivo es convertirnos en una marca reconocida de artículos de papelería sostenible en Paraguay e incorporar otros productos escolares y de oficina respetuosos con el medioambiente. La inversión inicial cubrirá las materias primas, los materiales de encuadernación, el embalaje, las herramientas de producción y los elementos promocionales. Al comenzar a pequeña escala, controlar los costos y reinvertir parte de las ganancias, Oryza tiene el potencial de convertirse en un negocio rentable y, al mismo tiempo, ofrecer una alternativa útil y responsable frente a los cuadernos convencionales.

Company Description Worksheet

Business Name	MacroMania S.R. L
Company Mission Statement	Our mission is to create sustainable and eco-friendly notebooks using agricultural waste such as rice husk and sugar cane, providing our customers with an environmental and responsible alternative to traditional notebooks. As a company we want to transform agricultural waste into a useful product while promoting sustainability and responsibility.
Company Philosophy/ Values	Sustainability: Our company prioritize materials that reduce agricultural waste and environmental impact. Innovation: We look for transforming agricultural waste into a useful product. Responsibility: We believe that our company will contribute positively to the environment and society. Community: We want students and community to make more environmentally conscious choices. Our vision is to become recognized as a sustainable and eco-friendly company that inspires people to choose environmentally products. In the long term, we want to expand our notebooks and create other school or university supplies made from sustainable and agricultural materials.
Company Vision	To provide students with notebooks that combine learning and organization while promoting environmental awareness and sustainability.
Goals & Milestones	Short-term goals Create a notebook cover that is strong, functional and good quality. Produce our first successful prototype. Calculate the cost of producing each notebook. Long – term goals Sell our notebooks to students and environmentally conscious consumers. Develop additional sustainable products. Build a recognizable brand focused on sustainable and innovative products.
Target Market	The target market includes students, teachers, parents, and environmental conscious customers who are looking for a practical notebook that combines education, organization, and sustainability.
Industry/ Competitors	Oryza's main competitors are traditional notebook brands such as Avon, as well as reusable notebook brands like Cuaderno Inteligente and Rocketbook. Traditional notebooks are generally cheaper, while imported reusable notebooks are more expensive. Oryza stands out by combining a reusable disc system, replaceable sugarcane-paper pages, a rice-husk cover, personalization, and an affordable price of Gs. 65,000.

Legal Structure/ Ownership	Oryza will operate as a Limited Liability Company (S.R.L.) in Paraguay. It will be owned by its five founding partners: Jazmin Pereira, Santiago Leiro, Joaquín Duarte, Melissa Verón, and Constanza Melgarejo. Each partner's responsibility for the company's debts will be limited to the value of their contribution.

Products & Services Description

Product/ Service Idea	Our product is a biodegradable notebook made from recycled paper from printing factories and a cover made with rice husks that are agricultural waste. These industrial and agricultural waste create pollution and contribute to environmental problems. We transform industrial waste into a durable and eco-friendly notebook that naturally decomposes at the end. Our product is B2C because it's sold directly to students, teachers, or anyone who needs a notebook for school or personal use.
Special Benefits	Oryza helps reduce agricultural waste like rice husks and also paper waste, promoting recycling and reducing the need to cut down more trees. Customers will choose Oryza because it is environmentally friendly, durable, practical, and helps reduce their environmental impact without sacrificing quality.
Unique Features	Oryza stands out because it combines recycled paper with a biodegradable cover made from rice husks. Our notebooks aren't like traditional notebooks, they use waste materials, reducing polluting and supporting circular economy.
Limits and Liabilities	Biodegradable materials may be more expensive than normal materials, which could increase the final product price. Our company must ensure that the rice husk cover is strong, durable, and safe for everyday use. Some customers may question the quality or durability of our notebooks, so we will provide information and test our product as many times as possible.
Production and Delivery	Our notebooks are made using recycled paper waste and the cover is made from rice husks. First, the paper waste is cleaned, recycled, and processed into new sheets. Then, the rice husks are cleaned, mixed with glue, and molded into a notebook cover. The notebooks are assembled using glue and packaged in recyclable materials. Oryza will be sold directly to customers through our online store, bookstore and eco-friendly store. We will also offer home delivery for online orders.
Suppliers	Our recycled paper will come from printing companies, and the rice husk will be supplied by local rice mills. We will also purchase glue and recyclable packaging. Working with local suppliers will help reduce transportation costs and support the local economy.

Intellectual Property Special Permits	Our product will have the brand name Oryza and a unique logo to represent us, and they will be trademarks to protect our identity. Our notebooks are a stationery product, so it doesn't require special health. Our company must comply with environmental regulations and quality standards for recycled materials. If we develop a unique manufacturing process, we may also apply for a patent.
Product/ Service Description	Oryza is a biodegradable notebook made from recycled paper waste and a sustainable cover created from rice husks. It transforms industrial and agricultural waste into a practical, high-quality and eco-friendly product for all people. Oryza helps protect the environment while offering a durable and better alternative than traditional notebooks. Our product combines sustainability and innovation, making it a smart choice for consumers who care about the planet.

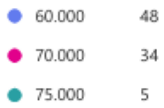

Circular Economy

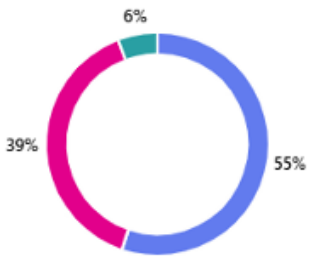

Oryza will apply the circular economy by transforming waste materials, such as rice husks and used paper, into notebook covers instead of throwing them away. The notebooks will also use sugarcane paper and a reusable disc-binding system, allowing customers to replace only the pages or cover, when necessary, rather than buying a completely new notebook. This reduces waste, extends the product's useful life, and promotes the reuse of materials.

Marketing Plan

Market Research

1. ¿Qué precio le parecería razonable para un cuaderno inteligente biodegradable?

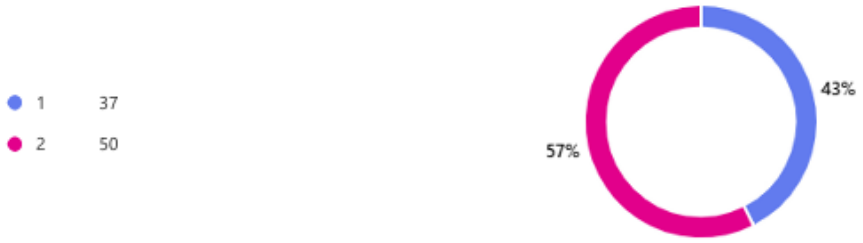

2. ¿Adquirirías un cuaderno biodegradable en vez de un cuaderno normal?

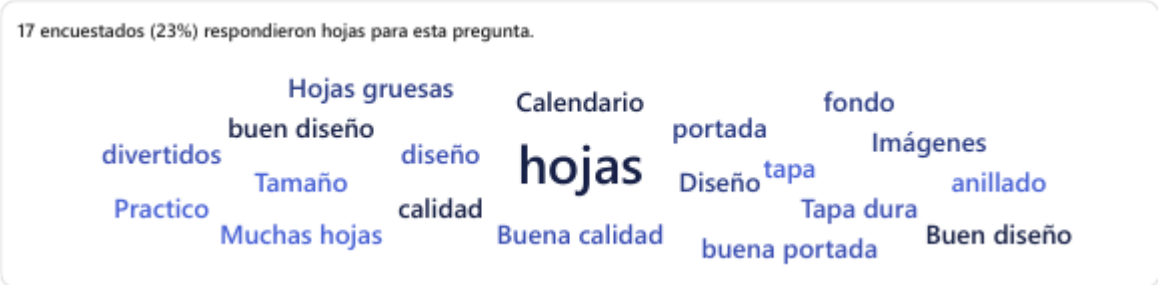

3. ¿Cuál de estos dos cuadernos prefieres?

4. ¿Les gustaría poder seguir usando el mismo cuaderno simplemente cambiando las hojas?

5. ¿Qué tendría que tener un cuaderno para que te guste?

6. ¿Hay alguna marca de cuadernos biodegradables que sigas activamente en plataformas de redes sociales?

7. Si te dijera que este cuaderno está hecho con cáscara de arroz y ayuda al medio ambiente ¿te llamaría la atención?

8. ¿Seguirías en las redes sociales a una compañía de cuadernos inteligentes biodegradables que proporcionaría consejos y actualiza sobre la línea del producto?

9. ¿Recomendarías el uso de productos biodegradables que respetan el medio ambiente a otros miembros de tu familia o círculo social si la calidad es buena?

10. Prefieres que la portada sea:

11. ¿Cree que el uso de productos biodegradables y sostenibles como son nuestros cuadernos inteligentes podrá contribuir para lograr los objetivos de la ODS?

Barriers to Entry

When entering the notebook market. One of the main challenges is competing with established brands such as Rocketbook, Cuaderno Inteligente, and Avon, which already have loyal customers and greater market recognition. As a new company, we will need to invest time and money in promotion to build trust and make our product known.

Other barriers include the initial cost of equipment and materials, finding reliable suppliers, and producing enough notebooks while maintaining consistent quality. Since the covers are handmade from rice husks and recycled paper, production may take longer than conventional manufacturing.

Threats and Opportunities

The main opportunities come from the growing interest in sustainable and reusable products. The company can attract students, teachers, and environmentally conscious consumers looking for an alternative to traditional notebooks. It could also form partnerships with schools, businesses, foundations, and recycling organizations. In the future, the brand may expand its product line, offer personalized designs, and sell through bookstores or online platforms.

However, possible threats include competition from well-known brands, changes in material prices, supply shortages, and customers choosing cheaper traditional notebooks. Competitors could also imitate some of the product's sustainable features. Another risk is receiving negative feedback if the handmade covers are not strong or consistent enough. For this reason, the company must maintain good quality, control production costs, and clearly communicate what makes the product different.

ORYZA

SWOT Analysis Worksheet

Business areas	Internal factors		External factors	
	Strengths	**Weaknesses**	**Opportunities**	**Threats**
Product/ Service Offering	Eco-friendly agendas made from recycled rice husks and offering also sustainable products.	The product may be less durable than traditional agendas.	Growing demand for eco-friendly and sustainable products.	We can get diminished by other companies.
Brand/ Marketing	We can reach the right customers through effective promotion.	Our brand is new and not yet well known.	Use social media to promote our sustainable agendas.	We can get bad reviews from people and that can give the brand notoriety.
Staff/HR	Good work in group because we help in different tasks to achieve the project's goals.	Limited experience in product development.	Learn new skills in teamwork.	Conflict of interest can also bring us down.
Finance	We have enough reserves to invest and grow because our product is not so expensive to create.	Limited Budget	Reduce costs by using recycled agricultural waste as a raw material	The limited funding may restrict marketing and product development.
Operations/ Management	Efficient production processes minimize industrial waste.	No Motivation	Improve production by developing better ways to recycling rice husk into paper	We have some conflicts of interest and that can diminish our productivity.
Market	Strong demand for eco-friendly products.	Small Market.	More consumers are choosing sustainable products every year.	Not eco-friendly products produce more massively.

Can any of your strengths help with improving your weaknesses or combating your threats? If so, please describe how below.
Yes. Our teamwork, efficient production, and the growing demand for eco-friendly products can help us improve our limited experience, increase motivation, and compete with mass-produced products.
Based on the information above, what are your immediate goals/next steps?
Finish the product, promote it on social media, and get feedback from potential customers.
Based on the information above, what are your long-term goals/next steps?
Grow our brand, reach more customers, improve the product, and expand our business with more eco-friendly products.

Factors Affecting Product Supply and Demand

The supply of Oryza notebooks depends on the availability and cost of materials such as rice husks, recycled paper, sugarcane paper, white glue, starch, and binding discs. It can also be affected by production time, since the covers must be molded and dried correctly. Other important factors include access to equipment, transportation costs, the number of people working on production, and our suppliers' ability to deliver materials on time.

Demand can be influenced by the price of the notebook, customers' interest in sustainable products, the beginning of the school and university year, and the effectiveness of our promotion on Instagram, TikTok, WhatsApp, and at local events. The product's design, quality, durability, and customization options can also affect customers' willingness to buy it. Demand may increase as more people become concerned about waste and environmental problems.

Product/Service Features and Benefits

Eco-friendly notebook made with a cover containing rice husks and recycled paper, along with sugarcane paper for its pages. Its disc-binding system allows users to remove, reorganize, and replace pages easily. Customers can also replace the cover or refill the notebook without buying a completely new one. These features make Oryza practical, customizable, reusable, and less wasteful than a traditional notebook.

Target Customer

Our main target customers are secondary school and university students from Asunción and Gran Asunción. They frequently use notebooks and are interested in products that are practical, modern, customizable, and environmentally responsible. Teachers and other environmentally conscious consumers are also part of our secondary market.

For Consumers

Oryza offers consumers a notebook that they can adapt to their needs by adding, removing, or reorganizing pages. Its reusable structure can help them reduce waste and avoid replacing the entire notebook. It also gives students an opportunity to express their style while choosing a more sustainable school product.

For Businesses

Oryza can provide businesses, schools, and organizations with sustainable notebooks for employees, students, events, or promotional gifts. The covers could be personalized with the organization's name or logo. This would allow businesses to support an environmentally responsible local product while strengthening their own sustainable image.

Key Competitors

Our direct competitors are Rocketbook, Cuaderno Inteligente, and Avon. These three companies offer notebooks that compete with Oryza because of their practicality, design, or reusable features. Rocketbook offers reusable notebooks that work with digital technology, while Cuaderno Inteligente uses a disc-binding system that allows customers to remove and reorganize pages. Avon offers accessible stationery products and competes through its established market presence and variety of designs.

However, Oryza is different because it combines a reusable disc system with materials such as rice husks, recycled paper, and sugarcane paper. It also focuses on local production and on transforming waste into a useful product. This gives Oryza a stronger circular-economy purpose while still offering the organization, personalization, and attractive design that students want.

Competitor Data Collection Plan

Competitor 1: Rocketbook

Competitor 2: Cuaderno Inteligente

Competitor 3: Avon

Price	Gs. 255.500. Other models range from approximately Gs. 146.000 to Gs. 401.500.	Prices vary according to size and design. Some notebooks start at approximately Gs. 101,000, while premium models such as the Black notebook can cost around Gs. 197,000.	Prices in Paraguay range from approximately Gs. 2,000 for a 20-page notebook to Gs. 17,500 for a 96-page university notebook. A 96-page standard notebook costs approximately Gs. 8,800–9,450.
Benefits/Features	Reusable pages that can be cleaned with water, a Pilot FriXion pen, a microfiber cloth, and an app that scans notes and sends them to services such as Google Drive, Dropbox, and OneNote. It reduces paper waste and helps users organize notes digitally.	Its disc system allows customers to remove, replace, and reorganize pages. Users can also change covers, add refills, use dividers, and personalize the notebook.	Avon offers hard- and soft-cover notebooks in different sizes, colors, designs, and page formats. Some models have resistant cardboard covers, metal spirals, glossy finishes, stickers, and licensed designs.

Size / profitability	Rocketbook reports that it has sold more than one million notebooks. Its products are sold through its official online store and are available internationally.	The brand states that it has operated in Brazil since 2010. Its official online catalog lists more than 100 notebook options, in addition to refills and accessories.	Avon notebooks are manufactured in Paraguay by Nobel S.A. They are available from several Paraguayan retailers, including Ofipar, Salemma, Maita, and Los Jardines. The company also offers wholesale sales and nationwide delivery.
Market strategy	It uses its website and social media to promote sustainability, technology, productivity, special bundles, and discounts. It is mainly marketed to students, teachers, professionals, and creative users.	It promotes its products through Instagram and its website, focusing on customization, organization, creativity, attractive designs, accessories, and collaborations. It also offers discounts and outlet products.	The brand uses Instagram and Facebook, attractive cover designs, promotions, and drawing contests. Its “Expresá tu mundo” contest invites young people to create artwork that may become a notebook cover.

Competitive Analysis

Products

Oryza – S: Our notebook is reusable, customizable, and made with rice husk covers and sugarcane paper.

Rocketbook – S: It offers reusable pages and allows users to scan their notes with an app.

Cuaderno Inteligente – W: Its removable-page system is useful, but its materials do not focus as much on agricultural waste.

Cuadernos Avon – S: It offers several types of traditional notebooks for different school needs.

Price

Oryza – S: We plan to offer a reasonable price, especially because customers can reuse the cover and only buy paper refills.

Rocketbook – W: It is imported and more expensive than most regular notebooks.

Cuaderno Inteligente – S: Its reusable design gives customers long-term value because the pages can be replaced.

Cuadernos Avon – W: Even though some Avon notebooks are inexpensive, customers must buy a completely new notebook when the pages run out.

Quality

Oryza – S: We will check every cover, page, disc, and binding before selling the notebook.

Rocketbook – S: It is made with resistant reusable pages and has a well-developed digital system.

Cuaderno Inteligente – S: It uses resistant covers, quality paper, and a practical disc-binding system.

Cuadernos Avon – S: It is a known school-supply brand with durable traditional notebooks.

Service

Oryza – S: We will communicate directly with customers and offer personalized covers and replacement pages.

Rocketbook – S: The company provides customer support and information through its website and app.

Cuaderno Inteligente – S: It offers different notebook sizes, accessories, and paper refills.

Cuadernos Avon – S: Its products are available through several stationery stores and distributors.

Reliability

Oryza – S: Every notebook will be inspected before delivery, and defective products will be replaced.

Rocketbook – S: It has an established system for writing, scanning, erasing, and reusing pages.

Cuaderno Inteligente – S: Its disc system is already recognized and allows pages to be changed safely.

Cuadernos Avon – S: The brand has produced school supplies for many years and is trusted by customers.

Stability

Oryza – S: Our materials are accessible, and small-batch production will help us control expenses.

Rocketbook – S: It is an international company with an established product line.

Cuaderno Inteligente – S: It has a recognized brand and sells notebooks, refills, discs, and accessories.

Cuadernos Avon – S: It is an established Paraguayan brand with regular demand for school supplies.

Expertise

Oryza – S: Our team has researched sustainable materials and tested the rice husk cover.

Rocketbook – S: It has experience combining reusable notebooks with digital technology.

Cuaderno Inteligente – S: It specializes in disc-bound notebooks and removable-page systems.

Cuadernos Avon – S: It has experience producing different types of school and office notebooks.

Company Reputation

Oryza – W: Our company is new, so most customers do not know or trust the brand yet.

Rocketbook – S: It is internationally recognized for its reusable and app-connected notebooks.

Cuaderno Inteligente – S: It is a popular brand among students and people interested in stationery.

Cuadernos Avon – S: It is a familiar Paraguayan brand that has been present in the market for many years.

Location

Oryza – S: Our production space is located in Asunción and is accessible to suppliers and delivery services.

Rocketbook – W: It is not produced locally, so Paraguayan customers may depend on international shipping or importers.

Cuaderno Inteligente – S: Its products can be purchased online and through regional sellers.

Cuadernos Avon – S: Its products are widely available in local stationery stores in Paraguay.

Sales Method

Oryza – S: We will sell online, receive personalized orders, and deliver products directly to customers.

Rocketbook – S: It sells through its website and different online and physical retailers.

Cuaderno Inteligente – S: Customers can purchase notebooks, refills, and accessories online.

Cuadernos Avon – S: It sells through many local stationery stores and distributors.

Advertising

Oryza – S: We will use social media to show the production process, designs, and environmental benefits.

Rocketbook – S: It has a strong online presence and promotes the connection between its notebook and app.

Cuaderno Inteligente – W: The brand has a strong presence in some countries, but its advertising and availability are more limited in Paraguay.

Cuadernos Avon – S: It is promoted by stationery stores and is already recognized by Paraguayan customers.

Competitive Advantages and Disadvantages

Our main competitive advantages are the use of rice husk and sugarcane paper, the reusable cover, removable pages, personalization, and local production. Avon notebooks, customers do not have to replace the entire product when the pages are finished. Our notebook may also be more accessible locally than Rocketbook or Cuaderno Inteligente.

Our main disadvantages are that the company is new, has a limited product variety, and does not yet have a reputation or reliability like the other brands. To improve these, we will test the notebooks, collect customer reviews, offer good service, and publish the production process and environmental purpose on social media.

Positioning/Niche

Oryza is a brand created by students who want to offer a different type of notebook, combining sustainability, creativity, and practicality. Our niche mainly consists of secondary school and university students from Asunción and Gran Asunción who use notebooks frequently and are interested in products that are personalized and more environmentally responsible. This group is more specific than the general stationery market because we focus on students who do not only want a notebook for writing but also want a product that represents their personal style and helps reduce unnecessary waste.

We want Oryza to be seen as a modern, reusable, and sustainable alternative to conventional notebooks. Our covers are handmade using rice husks, recycled paper pulp, cornstarch, white glue, and water. The inner pages are made from sugarcane paper and are connected through a removable disc-binding system. This system allows students to add, remove, replace, and reorganize their pages without having to purchase a completely new notebook. Customers will also be able to personalize their covers by selecting different colors, names, and designs.

Oryza is a B2C company; we will use a combination of online and out-of-home advertising to reach individual consumers. Our marketing strategy will focus on reaching customers where they can discover our new products.

- Our main advertising methods will be social platforms like Instagram, TikTok, Snapchat, and Facebook.
- We may use flyers, posters, and print advertisements in locations where our target customers are more likely to see them.

- Our brand can use posters, signs, and advertisements will have clear visuals and short messages for customers to find Oryza online.

  The image we want to project is natural, modern, creative, and environmentally responsible. Our logo and promotional materials will use colorful tones because these colors represent nature, rice husk, and the materials used in the notebook. The name Oryza comes from the scientific name associated with rice, connecting the brand directly to the main material used in our cover. We will maintain the same colors, fonts, and visual style in our packaging, social media posts, flyers, signage, and future physical store. This consistent design will make Oryza easier to recognize and help customers connect the brand with sustainability, personalization, and responsible consumption.

	Product reviews / unboxings		X						X								X									X							X								X							x	
	Notebook Giveaways						X				X				X				X					x				X				x				X						X				X				X

Oryza's before-startup promotional cost is Gs. 440,000. Most of this amount will be used for collaborations with Instagram and TikTok creators, which will cost Gs. 325,000 because five notebooks will be given to them in exchange for promotional content. We will also spend Gs. 65,000 on a free product sample and Gs. 50,000 on business cards. Instagram Reels, feed posts, the company website, and the landing page will have no cost because they will be created by our group using free tools.

The monthly ongoing promotional cost will be Gs. 450,000, giving an annual ongoing cost of Gs. 5,400,000. Including the startup expenses, Oryza's estimated first-year promotional cost will be Gs. 5,840,000. The main monthly expense will be notebook giveaways at Gs. 195,000, followed by printed flyers at Gs. 150,000 and trial-size notebooks at Gs. 80,000. Branded stickers will cost Gs. 25,000, while TikTok videos, product reviews, live interactions, and online order management will have no cash cost because our team will complete these activities.

What image do you want to project for your business brand?

What design elements will you use to market your business? (This includes your logo, signage and interior design.) Explain how they'll support your brand.

Oryza is a sustainable notebook brand created around the idea that useful school products can reduce both agricultural waste and unnecessary notebook consumption. Many notebooks are discarded every year after their pages are used, creating waste throughout a person's school life. Oryza offers an alternative through a reusable disc-binding system that allows users to add, remove, replace, or reorganize pages and covers without purchasing a completely new notebook. Its identity combines nature, creativity, education, and reuse through a notebook made with a rice-husk cover and sugarcane-paper pages.

The brand name is Oryza, which means "rice" in Latin. It is short, distinctive, and easy to remember, making it appropriate for a modern school product. The name also gives the brand a natural and original personality instead of making it sound like a traditional notebook company.

The connection between the brand and the product is direct because the notebook cover is made using rice husk, recycled paper pulp, cornstarch, white glue, and water. The inner pages are made from sugarcane paper. In addition, the disc-binding system allows users to add, remove, replace, and reorganize as many pages as necessary. The cover can also be removed or replaced without discarding the rest of the notebook. This system helps extend the product's useful life and reduces the need to purchase and throw away complete notebooks whenever the pages run out or the cover becomes damaged.

Oryza is mainly directed for students, teachers, and environmentally conscious consumers who need practical notebooks and care about the impact of the products they buy. Students can adapt the number and order of the pages according to different subjects or activities, making the notebook more convenient for everyday schoolwork. The modern name, pencil symbol, friendly slogan, and soft natural colors make the brand attractive and approachable to young customers without being too formal.

Our brand is positioned as a sustainable, customizable, and practical alternative to a conventional notebook. Its main difference is that customers do not need to discard the entire notebook when its pages are used. They can keep the discs and other usable parts while replacing only the pages or cover when necessary. This reduces notebook consumption while also helping manage agricultural waste using rice husk and sugarcane paper. Oryza shows that an eco-friendly product can still be attractive, useful, durable, and suitable for everyday schoolwork.

The primary logo combines the word ORYZA with a pencil that continues into an irregular underline. The pencil represents writing, learning, design, and the creation of ideas. The draw line gives the logo a creative and youthful appearance, while the slogan “Donde nacen las ideas” explains the purpose of the notebook. Together, these elements show that Oryza is a place where ideas can begin while maintaining a connection with nature, education, and creativity.

The color palette uses six natural tones: soft cream (#F3EBDD), light beige (#D8C3A5), warm tan (#B3926D), terracotta brown (#A66A4E), muted olive green (#7B8060), and dark brown (#514238). The cream and beige shades represent paper, natural fibers, and simplicity. The terracotta colors connect the identity to rice husk, soil, and handmade materials. The olive green represents sustainability and environmental responsibility, while the dark brown provides contrast. Together, these colors create a warm and organic appearance.

League Spartan is the primary typography used for the brand name and important headings. Its bold geometric letters make ORYZA easy to recognize and give the brand a strong, modern, and organized appearance. Better Together Spaced is the secondary typography used for the slogan and decorative text. Its handwritten style adds creativity, friendliness, and a personal feeling.

Promotional Budget

- Oryza's before-startup promotional cost is Gs. 440,000. Most of this amount will be used for collaborations with Instagram and TikTok creators, which will cost Gs. 325,000 because five notebooks will be given to them in exchange for promotional content. We will also spend Gs. 65,000 on a free product sample and Gs. 50,000 on business cards. Instagram Reels, feed posts, the company website, and the landing page will have no cost because they will be created by our group using free tools.
- The monthly ongoing promotional cost will be Gs. 450,000, giving an annual ongoing cost of Gs. 5,400,000. Including the startup expenses, Oryza's estimated first-year promotional cost will be Gs. 5,840,000. The main monthly expense will be notebook giveaways at Gs. 195,000, followed by printed flyers at Gs. 150,000 and trial-size notebooks at Gs. 80,000. Pricing Strategies

Name of the company	Oryza	
Which of the pricing strategies are you using?		
Skimming	**Value Based**	**Cost – Plus X**
We chose cost-plus pricing. The estimated production cost is Gs. 45,608 per notebook. We add Gs. 19,392 as profit, which gives a proposed selling price of Gs. 65,000. This represents a 42.5% markup on the production cost and a 29.8% profit margin on the selling price. The price is also supported by the competition: Rocketbook Core notebooks start at approximately Gs. 208,000, while Cuaderno Inteligente models cost around Gs. 196,000, before international shipping or import costs. These conversions are based on current approximate exchange rates. *Traditional Avon notebooks are cheaper, but they do not include a reusable disc system, replaceable sugarcane-paper pages, a rice-husk cover, or personalization. Our main target market is secondary and university students in Asunción and Gran Asunción who want an original and more sustainable notebook. Therefore, Gs. 65,000 covers the production cost, provides a reasonable profit, remains more accessible than many imported reusable notebooks, and positions the product as an affordable, eco-friendly, and reusable alternative rather than a basic low-cost notebook.*		

Distribution Channel Assessment Worksheet

	Online Sales with delivery or pick up	Sales in libraries and stationery stores	**Sales at local events or school events**
Ease of Entry	Our company will create an online store, Instagram or WhatsApp. We would organize payments, orders, packaging, and delivery.	Organize agreements with stores, a regular supply of our notebooks.	With a small stand on fairs and its current inventory. It only needs permission from the event.
Geographic Proximity	Customers can order from Home in Asunción or near cities, then choose delivery or pick up.	Good when stores are located near schools, universities or shopping areas.	Good for students, teachers, or families who attend fairs and environmental events in Asunción area.
Costs	Low to medium: packaging and delivery fees, possible digital payment fees. Pickup can reduce delivery costs.	High cost since the retailer has commission, transportation, storage and cost of maintaining enough stock.	Low cost, transportation, materials for the stand, product display and possible event fees.

Competitors' Positions	Many competitors sell through social media and delivery. We can stand out with clear product photos, customization, and their environmental value.	Other notebook brands already have strong relationships, space in stores and recognition.	Some sustainable notebook brands and craft sellers use fairs because customers can see and touch the product.
Management Experience	We must organize messages, orders, payments, inventory, delivery schedules, pick-up time and customer service.	It requires more experience for negotiations, stock replacement, and payment terms.	Basic skills are needed to manage inventory, cash or digital payments, display products, and explain the materials and benefits to customers.
Staffing Capabilities	Responsibilities will be divided, one person answering orders, others preparing and packing, another coordinating deliveries or pickup.	Someone responsible for store relationships and deals, transportation, inventory, and restocking.	Two or three group members can operate the stand, manage payments, answer questions, and restock products.
Marketing Needs	Social media posts, videos, reviews, WhatsApp catalog and clear information about our product	Labels, packaging, and on social media we should tell in which stores customers can find our product.	Post event dates and locations on Instagram, TikTok, and WhatsApp. Use an attractive stand, samples, flyers, and demonstrations of the recycled materials.

Pronóstico de ventas de 12 meses / 12-Month Sales Forecast

Para realizar la proyección de ventas se tuvo en cuenta el punto de equilibrio, calculado en 947,2 unidades mensuales. Como no es posible vender una fracción de un producto, este resultado se redondeó a 948 cuadernos. Se estima comenzar en enero con la venta de 1.030 unidades, superando así el punto de equilibrio, y aumentar las ventas en 5 unidades cada mes. El precio de comercialización será de Gs. 65.000 por unidad.

De acuerdo con esta proyección, durante el primer año se venderían aproximadamente 12.690 cuadernos, generando un ingreso anual estimado de Gs. 824.850.000. Esta estimación permitirá conocer los posibles ingresos obtenidos mediante la comercialización del producto.

Presupuesto de Ventas			
N°	Producto o Servicio	Proyección de Ventas	
		Mensual en Gs.	Anual en Gs.
1	**Cuaderno Biodegradable**		
	Cantidad Vendida	1,030	12,690
	Precio x Unidad	65,000	65,000
	Total Gs.	66,950,000	824,850,000

Plan Operativo

Producción

El proceso de producción de los cuadernos biodegradables se realizará de la siguiente manera:

Se recibirán y clasificarán las materias primas, principalmente la cáscara de arroz donada por una arrocera, el papel reciclado proporcionado por una fundación y una empresa, y el papel de caña de azúcar adquirido de J.W. Enterprise.

La cáscara de arroz será limpiada y secada para eliminar restos de polvo, humedad u otras impurezas.

El papel reciclado se cortará en pedazos pequeños y se dejará en agua hasta ablandarse. Luego, se triturará para formar una pulpa uniforme.

La pulpa de papel se mezclará con la cáscara de arroz, maicena, cola blanca y agua hasta obtener una preparación moldeable.

La mezcla se colocará en moldes y se prensará para darle el tamaño, el grosor y la forma correspondientes a las tapas.

Las tapas se dejarán secar completamente. Una vez secas, se retirarán del molde y se recortarán para conseguir una terminación uniforme.

Las hojas de papel de caña de azúcar se cortarán de acuerdo con las medidas del cuaderno y se perforarán utilizando una perforadora especial para discos.

Finalmente, se colocarán las tapas, las hojas y los discos para completar el armado. El producto terminado será revisado, etiquetado y colocado en su empaque para su comercialización.

Control de calidad

Antes de autorizar la comercialización de cada lote, se verificará que los cuadernos cumplan con los estándares de calidad establecidos. Las tapas deberán presentar un grosor uniforme, estar completamente secas y no tener grietas, humedad, deformaciones ni bordes peligrosos. También se comprobará su resistencia mediante pruebas de manipulación y flexibilidad, con el objetivo de asegurar que protejan correctamente las hojas.

Se revisará que el papel de caña de azúcar esté limpio, correctamente cortado y sin hojas arrugadas o dañadas. Las perforaciones deberán estar alineadas para que las páginas puedan retirarse y colocarse nuevamente sin romperse. Además, se verificará que los discos estén bien ajustados y permitan abrir el cuaderno y mover las hojas con facilidad.

Durante la producción se mantendrán limpias las superficies, los moldes y las herramientas. Cada lote será registrado para identificar su fecha de elaboración y los materiales utilizados. Solamente los cuadernos que superen la revisión final serán etiquetados, empaquetados y habilitados para la venta.

Ubicación

La producción se realizará inicialmente en un pequeño espacio ubicado sobre Rogelio Benítez, entre El Maestro y Bertoni 8961. El lugar será utilizado solamente para fabricar y almacenar los cuadernos, ya que Oryza todavía no contará con una tienda física. Las ventas se realizarán por Instagram, WhatsApp y en ferias escolares, con entrega local o retiro en un punto acordado.

Entorno jurídico

Para formalizar la empresa, se utilizará la figura jurídica de una Sociedad de Responsabilidad Limitada (S.R.L.), debido a que el emprendimiento está integrado por cinco socios. En este tipo de sociedad, el capital se divide en cuotas y cada integrante responde por las obligaciones sociales únicamente hasta el valor de su aporte. Esto permite separar, en condiciones normales, las responsabilidades de la empresa del patrimonio personal de sus miembros.

La denominación legal deberá incluir las palabras “Sociedad de Responsabilidad Limitada” o la abreviatura “S.R.L.”. El capital estará formado por los aportes realizados por los socios, que podrán ser en dinero o mediante bienes necesarios para la producción, como moldes, prensas, guillotinas, perforadoras y otros equipos. El monto deberá ser suficiente para cubrir la inversión inicial y permitir el funcionamiento del negocio.

La sociedad podrá comenzar a operar formalmente después de la elaboración y protocolización de la escritura pública, su inscripción en los registros correspondientes y la obtención de las habilitaciones tributarias y municipales.

Trámites para la apertura de la S.R.L.

Constitución por escritura pública – Escribanía

Se recurrirá a una escribanía para redactar la escritura de constitución. Este documento incluirá la denominación de la empresa, su domicilio, actividad económica, capital social, aportes de cada integrante, participación de los socios y designación de la gerencia.

Integración del capital social – Entidad bancaria

Los socios realizarán los aportes de capital establecidos en la escritura. Cuando corresponda, el dinero destinado a la integración del capital será depositado en una entidad bancaria habilitada. Los equipos u otros bienes aportados también deberán ser identificados y valuados.

Inscripción en los Registros Públicos

La escritura será presentada para la inscripción de la sociedad en el Registro Público de Comercio y en el Registro de Personas Jurídicas y Asociaciones. Con este trámite, la empresa adquiere reconocimiento jurídico y queda registrada oficialmente.

Publicación de la constitución

Se realizará la publicación correspondiente de la constitución de la sociedad, indicando sus principales datos legales, de acuerdo con los requisitos establecidos para este tipo de empresa.

Inscripción en la DNIT y obtención del RUC

La empresa deberá inscribirse en la Dirección Nacional de Ingresos Tributarios (DNIT) para obtener el Registro Único de Contribuyentes (RUC). Esto permitirá emitir comprobantes legales, declarar impuestos y realizar actividades comerciales formalmente.

Matrícula de comerciante

Se solicitará la matrícula de comerciante para acreditar legalmente el ejercicio habitual de actividades comerciales.

Habilitación de los libros contables

Se habilitarán los registros y libros contables exigidos según el régimen tributario correspondiente. En ellos se registrarán las compras, ventas, ingresos, egresos y demás operaciones realizadas por la empresa.

Inscripción municipal y patente comercial

Se solicitará la habilitación del local y la patente comercial en la Municipalidad de Asunción o en la municipalidad de la ciudad donde se instale definitivamente el negocio. También se deberán cumplir las condiciones municipales de seguridad, higiene, uso del espacio y prevención de incendios.

Inscripción patronal en el IPS

Si la empresa contrata trabajadores, deberá inscribirse como empleadora en el Instituto de Previsión Social (IPS). Esto permitirá registrar a los empleados y realizar los aportes correspondientes a la seguridad social.

Inscripción patronal en el MTESS

También deberá efectuarse la inscripción ante el Ministerio de Trabajo, Empleo y Seguridad Social (MTESS), registrar a los trabajadores y cumplir las normas laborales relacionadas con salarios, jornadas, contratos, vacaciones y seguridad ocupacional.

Registro de la marca en la DINAPI

La denominación, el logotipo y los demás elementos distintivos de la marca serán registrados ante la Dirección Nacional de Propiedad Intelectual (DINAPI). El proceso incluye la presentación de la solicitud, el pago de la tasa, el examen formal y la publicación correspondiente. Esto permitirá proteger legalmente la identidad de la empresa frente al uso o la copia por parte de terceros.

Permisos adicionales

Debido a que el producto consiste en cuadernos y no en alimentos, medicamentos o cosméticos, no será necesario registrarlo ante el INAN. Sin embargo, se consultará con el MADES y la municipalidad correspondiente para determinar si el proceso de elaboración necesita alguna autorización ambiental, especialmente por el manejo de residuos, agua, adhesivos y materiales utilizados durante la producción.

Obligaciones fiscales

Impuesto al Valor Agregado (IVA): grava la comercialización de bienes y servicios. La empresa deberá emitir comprobantes, registrar sus operaciones, presentar declaraciones juradas mensuales y pagar la diferencia entre el débito y el crédito fiscal. Para la venta de los cuadernos se considerará la tasa general del 10%.

Impuesto a la Renta Empresarial (IRE): grava las rentas o ganancias obtenidas por las actividades comerciales, industriales y de servicios. Su tasa es del 10% sobre la renta neta y se liquida después de finalizar el ejercicio fiscal.

Impuesto a los Dividendos y Utilidades (IDU): se aplica cuando los socios deciden distribuir las ganancias generadas por la empresa. La tasa es del 8% para residentes en Paraguay y del 15% para no residentes.

Patente comercial: es un tributo municipal que debe abonar la empresa por realizar una actividad económica. Su monto dependerá del capital declarado, la actividad desarrollada y las disposiciones de la municipalidad donde funcione el establecimiento.

Además, la empresa deberá conservar sus facturas y documentos respaldatorios, llevar registros contables actualizados y cumplir en tiempo y forma con las declaraciones tributarias, laborales y municipales correspondientes.

Inventario

Oryza llevará un registro de las materias primas disponibles, los cuadernos en proceso de elaboración y los productos terminados. La empresa mantendrá un stock mínimo de 10 cuadernos terminados por mes, para poder responder a pedidos inmediatos y participar en ferias escolares.

Las principales materias primas serán cáscara de arroz, pulpa de papel reciclado, fécula de maíz, cola blanca, agua, hojas de papel de caña de azúcar, discos y materiales de empaque. Estos materiales son de fácil adquisición, por lo que no será necesario acumular grandes cantidades. Las compras se realizarán mensualmente de acuerdo con el pronóstico de ventas.

Los materiales y productos terminados no necesitan refrigeración. Sin embargo, deberán conservarse en un lugar limpio, seco y ventilado, alejados de la humedad, el calor excesivo y la luz solar directa. La cáscara de arroz, la pulpa y la fécula de maíz se guardarán en recipientes o bolsas cerradas para evitar la humedad y la aparición de insectos. La cola blanca permanecerá en su envase original y correctamente cerrado. Las hojas, tapas y cuadernos terminados se almacenarán en estantes para evitar que se manchen, doblen o deformen.

Los cuadernos Oryza no poseen una fecha exacta de vencimiento. Se estima que pueden conservarse en buenas condiciones durante aproximadamente dos años o más, siempre que se almacenen correctamente. Antes de la venta se revisará que las tapas estén completamente secas, sin humedad, hongos, grietas ni deformaciones.

Cuadro de Mercaderías										
ENERO										23.420.729
FEBRERO										23.749.369
MARZO										24.091.409
ABRIL										24.433.449
MAYO										24.775.489
JUNIO										25.117.529
JULIO										25.459.569

SEPTIEMBRE										26.143.649
OCTUBRE										26.485.689
NOVIEMBRE										26.827.729
DICIEMBRE										27.169.769
Total Anual										303.475.988

Las compras de mercaderías corresponden principalmente a los materiales necesarios para la elaboración de los cuadernos Oryza. Las compras se realizarán mensualmente de acuerdo con el pronóstico de ventas y las necesidades de producción. Se estima un total anual de Gs.303.475.988 en compras. Para facilitar el flujo de efectivo, se proyecto pagar el 60% de las compras al contado y el 40% restante a un mes.

Proveedores

Para la producción de los cuadernos trabajaremos con distintos proveedores, según cada materia prima requerida. La cáscara de arroz será donada por una empresa arrocera, mientras que el papel reciclado será proporcionado por una fundación que recolecta cuadernos usados y por una empresa que entrega los papeles que ya no utiliza. Estas alianzas ayudarán a disminuir el costo de producción y permitirán aprovechar materiales que normalmente serían desechados.

El papel de caña de azúcar será adquirido de J.W. Enterprise. La plasticola blanca, la maicena y otros materiales básicos para elaborar las tapas serán comprados en supermercados. Por otro lado, los discos, materiales de empaque y demás accesorios serán adquiridos de proveedores comerciales seleccionados de acuerdo con su precio, calidad y disponibilidad.

Según la investigación realizada, en el sector comercial es común acceder a financiación por parte de los proveedores. Por ese motivo, hemos proyectado un sistema de pago a crédito en el que se abonará el 60% del valor de cada compra al contado, en el mismo mes en que se adquieren los materiales, y el 40% restante se pagará a 30 días, durante el mes siguiente. Este acuerdo permitirá disponer de las materias primas necesarias sin pagar inmediatamente el valor total de cada compra y ayudará a mantener un mejor flujo de efectivo.

Política de crédito

Oryza proyecta realizar la mayoría de sus ventas al contado, aceptando pagos en efectivo, transferencias bancarias y billeteras electrónicas. Para los pedidos personalizados se solicitará un adelanto del 50%, y el saldo deberá abonarse antes o al momento de la entrega.

También estaremos dispuestos a ofrecer financiación a clientes frecuentes, instituciones educativas o empresas que realicen compras en grandes cantidades. Antes de aprobar el crédito, analizaremos la capacidad de pago, el historial del cliente y el monto de la compra. En estos casos, se podrá abonar el 50% al contado y el 50% restante en un plazo máximo de 30 días.

Management Worksheet

	I'm Melissa Verón Co-Founder of MacroMania S.R.L I was born in Ciudad de México, on July 28, 2008. I am currently studying a Business Administration Baccalaureate at San Ignacio de Loyola School, located in Asunción, Paraguay. Thanks to the education I receive every day, I became more aware of environmental problems, and the needs students face every school year. This motivated me to think about a product that could be useful for students while also being more environmentally friendly. From this idea, the concept of biodegradable notebook was created. I decided to share the idea with my teammates to see if they were interested in developing the product together, and this is how the idea of our project began.
Gaps in Management or Experience	I oversaw elaborating the schedule for the Interescolar SIL 2026. This responsibility taught me and helped me develop different skills, such as multitasking, organization, time management, responsibility, and other soft skills.

	I'm Jazmin Pereira, Co-Founder and Marketing Manager of Oryza S.R.L. I was born on November 12, 2009. I am currently studying a Business Administration at San Ignacio de Loyola School in Asunción, Paraguay. Throughout my education, I have learned about the environmental problems caused by waste and the importance of developing more sustainable products. This motivated me to participate in the creation of a notebook made with a rice-husk cover, sugarcane-paper pages, and a reusable disc system. As Marketing Manager, I am responsible for helping develop the brand's identity, promotion, pricing, and communication strategies. My goal is to make the product attractive to students while clearly communicating its environmental benefits. Working on this project has allowed me to combine my creativity, interest in business, and concern for the environment.
Gaps in Management or Experience	I was in charge of the marketing team and managed communication with every brand involved in Interescolar SIL 2026. This experience helped me develop leadership, communication, negotiation, organization, time-management, and teamwork skills.

	I'm Constanza Melgarejo, Co-Founder of Oryza S.R.L. I am currently studying a Business Administration Baccalaureate at San Ignacio de Loyola School in Asunción, Paraguay. My interest in communication, business, and environmental sustainability motivated me to participate in the creation of our reusable notebook. Through this project, I have contributed to the brand's communication and development.
Gaps in Management or Experience	I was part of the communication team for Interescolar SIL 2026, where I helped share important information and coordinate different communication tasks. This experience helped me develop communication, organization, teamwork, responsibility, and time-management skills.
Advisors	Prof. Ada Espínola Prof. Maryann Wright Prof. María Felicia Gorostiaga Prof. Lourdes Aveiro Prof. Marian González

	Co-Founder and Marketing Manager of Oryza S.R.L. I was born on June 27, 2009. I am currently studying a Business Administration at San Ignacio de Loyola School in Asunción, Paraguay. My interest in business and environmental sustainability motivated me to help create a reusable notebook made with a rice-husk cover and sugarcane-paper pages. As Marketing Manager, I contribute to the brand's identity, promotion, pricing, and communication strategies.
Gaps in Management or Experience	I have participated in several school projects that require organization, responsibility, and cooperation. These experiences have helped me develop important skills such as communication, teamwork, problem-solving, time management, and decision-making.
Advisors	Prof. Ada Espínola Prof. Maryann Wright Prof. María Felicia Gorostiaga Prof. Lourdes Aveiro Prof. Marian González Prof. Soledad Gomez Profe. Lilian Verón Dra. Carmen Jiménez Lic. Liz Cristaldo
	I'm Santiago Leiro, Co-Founder of Oryza S.R.L. I am currently studying a Business Administration at San Ignacio de Loyola School in Asunción, Paraguay. Through this project, I have contributed to the planning and development of a reusable notebook made from sustainable materials. This experience has allowed me to improve my business knowledge and teamwork skills.
Gaps in Management or Experience	I have participated in different school projects that required planning, teamwork, and responsibility. These experiences helped me develop skills such as communication, organization, problem-solving, time management, and collaboration.

Uso del capital

La inversión inicial de Oryza será financiada mediante capital propio aportado por los cinco socios fundadores. No se utilizará financiamiento de terceros ni prestamos bancarios para iniciar las operaciones de la empresa. Los aportes de los socios estarán destinados a cubrir las principales necesidades para el funcionamiento inicial de la empresa.

El capital será usado para la adquisición de muebles y equipos, instalaciones, maquinarias y equipos de informática, necesarios para desarrollar las actividades de Oryza. Una parte será para los gastos de apertura y formalización, además de cubrir los gastos operativos y disponer de una caja chica para las necesidades iniciales.

También la utilizaremos para cubrir los costos de la producción de los cuadernos biodegradables y contar con un fondo para imprevistos. En total, la inversión inicial será de Gs. 63.683.865, financiada por el aporte de los socios. De esta forma, el capital permitirá cubrir las necesidades de inversión, producción y funcionamiento necesarias para poner en marcha Oryza.
