2026

Asunción, Paraguay

March to september 2026

Executive Summary

RELEAF started with the idea of giving yerba mate leftovers a second life. From this material, we create a bar scrub that helps moisturize dry skin, exfoliate, and remove excess oil. Its convenient format doesn't need rinsing, offering a fresh and eco-friendly option.

In Paraguay, drinking yerba mate generates a lot of waste that often goes unused, contributing to pollution and environmental problems. RELEAF turns this waste into an opportunity by creating a bar exfoliant that cares for your skin while helping protect the environment.

Our audience includes teenagers over 14 and adults of all ages, both men and women, mainly from Asunción and Greater Asunción. It is aimed at people interested in skincare and environmentally friendly products. RELEAF offers a practical, natural, and innovative option for everyday skincare.

RELEAF will mainly be distributed in Asunción and Greater Asunción, with shipments across the country. Sales will be made through social media and digital channels, using delivery services. We will also have a showroom at the Ita Ybate Building and plan to sell our products in pharmacies and other points of sale.

Our main competitors include Wembé, CeraVe, and La Roche-Posay. RELEAF stands out by combining natural ingredients with skincare benefits. The use of yerba mate, deeply connected to Paraguayan culture, gives our product a unique local identity while supporting sustainability. By turning waste into a skincare product, we combine beauty, practicality, and environmental responsibility while promoting the principles of the circular economy.

According to our financial plan, the necessary investment is 155,000,000 Gs. The projection indicates that RELEAF will be profitable, starting with 1,380 products sold in the first month and increasing sales by 7.97% by the end of the year. The net profit at the end of the year is projected to reach 6,600,000 Gs. We will also run promotions at a multi-brand store, a pharmacy, and through social media.

RELEAF comenzó con la idea de darle una segunda vida a las sobras de yerba mate. Con este material, creamos un exfoliante de barra que ayuda a hidratar la piel seca, exfoliarla y eliminar el exceso de grasa. Su formato conveniente no necesita enjuague, ofreciendo una opción fresca y ecológica.

En Paraguay, beber yerba mate genera muchos residuos que a menudo no se utilizan, contribuyendo a la contaminación y a los problemas ambientales. RELEAF convierte este desperdicio en una oportunidad al crear una barra exfoliante que cuida su piel mientras ayuda a proteger el medio ambiente.

Nuestra audiencia incluye adolescentes mayores de 14 años y adultos de todas las edades, tanto hombres como mujeres, principalmente de Asunción y la Gran Asunción. Está dirigido a personas interesadas en el cuidado de la piel y productos respetuosos con el medio ambiente. RELEAF ofrece una opción práctica, natural e innovadora para el cuidado diario de la piel.

RELEAF se distribuirá principalmente en Asunción y la Gran Asunción, con envíos por todo el país. Las ventas se realizarán a través de las redes sociales y los canales digitales, utilizando servicios de entrega. También tendremos una sala de exposición en el edificio Ita Ybate y planeamos vender nuestros productos en farmacias y otros puntos de venta.

Nuestros principales competidores son Wembé, CeraVe y La Roche-Posay. RELEAF se destaca por combinar ingredientes naturales con beneficios para el cuidado de la piel. El uso de yerba mate, profundamente conectado a la cultura paraguaya, le da a nuestro producto una identidad local única al tiempo que apoya la sostenibilidad. Al convertir los residuos en un producto para el cuidado de la piel, combinamos belleza, practicidad y responsabilidad ambiental mientras promovemos los principios de la economía circular.

Según nuestro plan financiero, la inversión necesaria es de 155.000.000 Gs. La proyección indica que RELEAF será rentable, comenzando con 1.380 productos vendidos en el primer mes y aumentando las ventas en un 7,97% para fin de año. Se prevé que el beneficio neto a fin de año alcance los 6.600.000 G. También realizaremos promociones en una tienda multimarca, una farmacia y a través de las redes sociales.

Company Description Worksheet

Relief	
Company Mission Statement	Our mission is to turn everyday moments into care, creating a natural exfoliant made from yerba mate that takes care of your skin and gives new life to waste.
Company Philosophy/ Values	Our company is based on quality, innovation, responsibility, and customer satisfaction. We value the use of carefully selected ingredients to create a product that combines nature, skincare, and convenience.
Company Vision	Our vision is to become a recognized Paraguayan brand in the skincare market, known for innovative and natural exfoliating products and for building a strong connection with our customers.
Goals & Milestones	Our first goal is to successfully launch the yerba mate exfoliating bar and produce the initial batch of 1.087 units. We also aim to establish our sales channels, reach more customers through social media, and expand to additional points of sales. In the future, we plan to develop new products and grow the brand nationally. Our corporate social responsibility goal is to donate a percentage of the annual profits to A Todo Pulmón Paraguay Respira to support reforestation projects. Additionally, we could participate in tree-planting activities with our employees and customers.
Target Market	Our target market is mainly teenagers and young adults who are interested in skincare and prefer practical, natural, and innovative products. We will focus on customers in Asunción and nearby areas, reaching them through social media, delivery services, and selected points of sale.
Industry/ Competitors	Our business belongs to the skincare and personal care industry, focusing on natural and practical exfoliating products. Our main competitors are brands that offer facial scraps, especially those made with natural ingredients. We will differentiate ourselves by using yerba mate as a key ingredient and presenting it in a convenient exfoliating bar format.
Legal Structure/ Ownership	We are an owner-run small business managing our own sales, money, and production. We rent a ready-to-use central office for Gs. 2,600,000 a month plus basic bills, which works great as a low-cost hub to manage our business and pack our yerba mate exfoliating bars for delivery.

Products & Services Description

Product/ Service Idea	Our product is a dry exfoliating bar made with organic ingredients and recycled yerba mate, a waste from the food industry that is usually thrown away. Yerba mate works as a natural exfoliant and helps stimulate the skin. The bar also contains salicylic acid to clean pores, rosehip oil to reduce dark spots, and jojoba oil to control excess oil. We will sell our products online and in Pharmacies. Our business is B2C because we sell directly to Customer.
Special Benefits	The main benefit of our product is that it improves skin health by exfoliating, cleaning pores, hydrating, and controlling excess oil. Its dry format does not require water, making it practical and helping reduce water consumption. Unlike traditional exfoliants, our product uses recycled yerba mate residue and natural ingredients, offering an effective skincare solution while reducing Waste. As part of our social responsibility, we will donate a percentage of our annual income to A Todo Pulmón Paraguay to support their environmental projects.
Unique Features	What makes our product different is the use of recycled yerba mate waste as a key ingredient. Instead of using only traditional cosmetic ingredients, our product transforms wasted material into something valuable. It combines the potential benefits of yerba mate with salicylic acid in a more creative and environmentally friendly skincare product. The product also promotes the idea that waste can become a useful resource.
Limits and Liabilities	One limitation is that the product must be formulated carefully to ensure that the yerba mate particles are suitable and safe for use on the skin. Salicylic acid can cause irritation, especially sensitive skin, if used incorrectly or at an inappropriate concentration. The product would require stability, safety, and skin-compatibility testing before commercial use. Another challenge is obtaining clean and consistent yerba mate waste and producing the product under hygienic conditions.
Production and Delivery	The production begins by collecting yerba mate waste, cleaning it, drying it, and then processing it. It is then combined with the other cosmetic ingredients, including salicylic acid, to create the exfoliant. The product could eventually be sold online, in stores, through delivery, or directly to customers.
Suppliers	The yerba mate waste could be collected from yerba mate producers, local businesses, restaurants, or households that generate this type of waste. Other ingredients, such as salicylic acid and cosmetic-grade oils or waxes, could be obtained from specialized raw-material suppliers. Packaging could come from companies that provide recyclable or environmentally friendly containers.
Intellectual Property Special Permits	For a cosmetic exfoliant like ReLeaf to be legally sold in Paraguay, it must follow the regulations of DINAVISA and MERCOSUR cosmetic standards. The manufacturer must have the appropriate authorization, and the product generally requires a Notificación Sanitaria Obligatoria (NSO), with safety process, quality, ingredients, and labeling requirements. A brand name and logo are used for identification, while a patent is not necessary unless the product contains a new creation.

Product/ Service Description	Our product is a sustainable exfoliant that transforms yerba mate waste into a valuable skincare ingredient, giving it a second use. The product combines processed yerba mate waste with salicylic acid to help remove dead skin cells and creates a softer and cleaner-looking skin. By reusing yerba mate waste, our project helps reduce waste and promotes the principles of the circular economy. This creative idea combines skincare and environmental responsibility, showing how industrial waste can be transformed into a useful product.

Circular Economy

The Circular Economy is an economic model that focuses on reducing waste, reusing materials, and giving resources a second life instead of throwing them away. It aims to keep products and materials in use for as long as possible while reducing environmental impact.

Some advantages of the Circular Economy are for example reduces the amount of waste produced, saves natural resources and raw materials, reduces environmental pollution, encourages innovation and sustainable businesses, gives waste materials a new purpose, can reduce production costs by reusing available resources.

ReLeaf applies to the principles of the circular economy by reusing yerba mate waste that would normally be thrown away and transforming it into a useful skincare ingredient. The yerba mate residue will be collected and processed before being incorporated into our exfoliating bars. This gives the waste a second life and reduces the amount of organic waste generated.

Marketing Plan

Market Research

To better understand our target market, we conducted an online survey with 89 respondents. The results showed strong potential for ReLeaf, as 53.7% of respondents said they would try an exfoliating bar made with yerba mate and salicylic acid, while 37.8% answered “maybe.” Additionally, 85.4% said they would purchase the product if it were natural and beneficial for the skin.

The survey also helped us make important decisions about our marketing strategy. Most respondents (56.1%) were willing to pay Gs. 70,000, making this our selected selling price. Sustainability was also important to our potential customers, with 78% considering eco-friendly products important or very important. In addition, 62.2% preferred to purchase the product in pharmacies, making pharmacies our main distribution channel.

Customer preferences also influenced the development and promotion of ReLeaf. Blemish reduction was the most attractive benefit, followed by gentle exfoliation and hydration. Respondents indicated that certified natural ingredients and positive customer reviews would increase their trust in the brand. They also preferred packaging that communicates freshness, while 69.5% showed interest in having different fragrance options. These findings helped us adapt our product and marketing strategy to the preferences of our potential customers.

Barriers to entry

ReLeaf may face competition from established skincare brands, legal and safety requirements, and difficulties building customer trust. Other barriers include production costs, marketing expenses, and finding consistent, high-quality yerba mate waste. However, our sustainable and innovative product can help us stand out.

Threats and opportunities

Threats Competition, high costs, and legal requirements. Opportunities growing interest in natural skincare, eco-friendly products, and social media can help ReLeaf attract more customers.

SWOT Analysis Worksheet

Business areas	**Internal factors**		**External factors**	
	Strengths	**Weaknesses**	**Opportunities**	**Threats**
Product/ Service Offering	Innovative & complete formula combining physical (Yerba Mate) and chemical (Salicylic Acid) exfoliants with soothing and moisturizing. agents (beeswax and jojoba oil).	Being new handcrafted, formula stability testing, and regulatory approvals are needed before commercial scaling.	Growing consumer trends toward natural, botanical, and locally sourced skincare.	Competition from established, imported dermo cosmetic brands occupying most of the market space.

Brand/ Marketing	Strong local identity and unique selling of a new type of Skincare. Accessible, competitive price point (70,000 ₲).	Brand is new with no prior market recognition or massive advertising budget.	Strategic partnership or shelf space in major retail chains like Farmacia Vicente Scavone for instant credibility and reach.	Consumer bias toward international skincare brands over new cosmetic innovations.
Staff/HR	Great operational structure allowing quick decision making and agility by the team.	Small team heavy dependance on the heads of the team for production, sales, and logistics.	Opportunities to train local technical staff or collaborate with pharmaceutical chemists and dermatologists as production grows.	Potential challenges in maintaining a group of production consistency without specialized staff during rapid growth.
Finance	Controlled fixed operational cost (2,600,000 ₲/month for an 80 m² space in Edificio Ita Ybate) and low overhead.	Tight initial cash and profit margins that depend heavily on production yield and retail distribution fees.	Potential access to local small business grants or eco-friendly and a sustainable startup funding in Paraguay.	Raw material cost inflation or extended payment terms required by retail distributors.
Operations/ Management	Strategic central location in Barrio La Encarnación (4 rooms for lab, storage, office, and dispatch) plus a prime customer point on Senador Long.	Initial production capacity constraints if demand grows suddenly.	Efficient local fulfillment influences local courier services, in-store pickup, and retail delivery networks.	Supply chain delays for specific cosmetic grade active ingredients: salicylic acid or kaolin clay.
Market	Direct presence in high-traffic commercial	Lack of an initial loyal customer base.	High at foot traffic and a concentrated target for the	Market saturation in personal care and entry

	and corporate regions in Asunción.		Asunción neighborhood.	barriers in established pharmacy chains.

Can any of your strengths help with improving your weaknesses or combating your threats? If so, please describe how below.
By mixing ingredients like Salicylic Acid and Yerba Mate, we create a unique and high-quality skincare product. This can help us enter popular stores like Farmacia Vicente Scavone, gain customers' trust, and compete with foreign brands. Our low office rent of 2,600,000 ₲ also helps us keep costs low and make a profit while selling the product for 70,000 ₲.
Based on the information above, what are your immediate goals/next steps?
Secure regulatory registration, set up our production and storage rooms, finalize the packaging, and execute a localized soft launch with samples around Senador Long.
Based on the information above, what are your long-term goals/next steps?
Expand brand visibility, launch complementary Yerba Mate skincare products, and explore regional export opportunities.

Factors affecting product supply and demand

Factors affecting Supply	Measures to control or minimize its effect
Availability of yerba mate	Have different suppliers: Work with more than one supplier so that if one cannot provide the ingredients, Releaf can continue production.
Cost of ingredients	Compare prices and buy in bulk: Compare prices from different suppliers and buy larger quantities when the price is better to reduce production costs.
Packaging availability	Keep extra packaging in stock: Store extra containers and packaging materials, so production does not stop if there is a shortage or delay.
Factors affecting Demand	**Measures to control or minimize its effect**
Customer preferences	Ask for feedback and improve the product: Listen to customers' opinions and make changes based on their suggestions and needs.
Competition	Highlight ReLeaf's natural ingredients: Show that ReLeaf uses natural ingredients, such as yerba mate, to make the product different from competitors.
Product price	Keep the price affordable: Set a reasonable price so more customers can afford the product while still covering production costs.

Product/Service features and benefits.

- Natural ingredients with properties that benefit the skin.
- Contains reused yerba mate, giving agricultural waste a second life.
- Helps exfoliate the skin and remove excess oil.
- Helps moisturize and improve the feeling of dry skin.
- Solid bar format that is practical and easy to use.
- Leave-on product, so it does not require rinsing.
- Promotes sustainability and the principles of the circular economy.

Target customer

Our target customers are people and businesses interested in skincare, natural products, sustainability, and innovative alternatives to traditional cosmetics.

For consumers

- Teenagers over 14 and adults of all ages.
- Men and women interested in skincare.
- People looking for natural and practical skincare products.
- Consumers who value environmentally friendly and sustainable products.

For businesses

- Pharmacies.
- Businesses interested in offering Paraguayan and environmentally conscious products.

Key competitors

- Wembé, CeraVe, La Roche-Posay

Positioning/Niche

ReLeaf's niche is aimed at environmentally conscious customers who are looking for a sustainable skincare product. Our company is based on a new innovative idea, an exfoliating stick that reuses yerba mate residues as part of its formula. Unlike conventional exfoliants, ReLeaf mixes skincare, convenience, and waste reduction all in one product. Its main competitive advantage is transforming an industrial residue that has a large production in our country, into a useful cosmetic product while offering our customers an easy use format.

How you will market your product/service

We will mainly be promoting ReLeaf through social media platforms like Instagram and TikTok, because they help us reach a broader number of young customers that are interested in skincare and sustainability. We will post content weekly, videos that include product demonstrations, educational post about industrial waste, and talking about the origins of our brand, while showing how ReLeaf was made and its use. To build trust, we'll use word-of-mouth and referrals, because recommendations from friends and customers create an environment of confidence from buyers towards our brand. For advertising, we will use social media constantly and create flyers and posters for school events. And lastly, we will have a business site that is going to be attached to our media platforms, so people can see more about us.

The image we want to project for our brand to be modern, natural, and sustainable. Our design will use earthy colors and natural elements connected to yerba mate and the environment. The ReLeaf logo will be simple and recognizable, incorporating elements such as the yerba mate leaves to represent nature. Our packaging, posters, and social media content will maintain the same visual identity so the customers can easily recognize the brand. These design elements will help support our message that ReLeaf is a skincare product that combines beauty with sustainability.

Promotional budget

PROMOTIONAL BUDGET

Use the same media/tools and channels from your Communication Plan. Research or estimate the real cost of each paid activity.

Media / Tool	Channel / Means	Action / Description	Budget Type	Cost per Unit (Gs.)	Quantity	Times per Month	Estimated Cost (Gs.)	Source / Cost Evidence

MACRO SUMMARY

The total before-startup promotional cost for ReLeaf is Gs. 12,524,000. This initial investment is primarily driven by print media, specifically the production of posters for schools and events, which accounts for Gs. 12,000,000 of the startup budget. The monthly ongoing promotional cost is estimated at Gs. 2,537,500. The promotional activity receiving the vast majority of this ongoing budget is digital advertising through TikTok influencer ads, which costs Gs. 2,400,000 per month. Other ongoing activities, such as Instagram and Facebook ads, require significantly smaller investments of Gs. 37,500 and Gs. 100,000 respectively, while various social media marketing and direct marketing efforts are conducted at no direct cost.

BUDGET SUMMARY

Before-Startup Promotional Cost	Gs. 12.524.000
Monthly Ongoing Promotional Cost	Gs. 2.574.000
Annual Ongoing Promotional Cost	Gs. 30.888.000
Estimated First-Year Promotional Cost	Gs. 43.412.000

Marketing Expenses Strategy Chart

	Target Market 1 Customer from retailors	Target Market 2 Online customers
One-Time Expenses	Logo and branding, promotional packaging, initial posters and brochures	Logo and branding, website/social media setup, promotional content
Monthly or Annual Expenses	Printed flyers and brochures, retailer promotional materials, advertisements according to the promotional budget	Instagram/Facebook advertisements, website hosting, online promotional content
Labor Costs	Salaries according to the HR plan; staff responsible for retailer relationships and promotion	Salaries according to the HR plan; staff responsible for online sales and social media

Pricing Strategies

Name of the company	ReLeaf	
Which of the pricing strategies are you using?		
Skimming	**Value Based**	**Cost - Plus**
ReLeaf uses a cost-plus pricing strategy. The cost of producing one 75 g bar is Gs. 29.654, and our selling price is Gs. 70.000. This gives us a potential gross profit of Gs. 40.346 per unit, representing approximately a 57.6% profit margin. We chose this price to cover our production costs, generate profit, and remain competitive in the skincare market.		

Distribution Channel Assessment Worksheet

	Distribution Channel 1	**Distribution Channel 2**	**Distribution Channel 3**
Ease of Entry	Difficult/Moderate	Difficult	Easy
Geographic Proximity	Pharmacies are located in many areas of Asunción and other cities, making the product easy for our target customers to find.	Supermarkets are widely distributed and are convenient places for customers to purchase every day and personal-care products.	Customers can access the website from anywhere and order the product for delivery, with good coverage in Central
Costs	Moderate	High	Low
Competitors' Positions	Conventional skincare is sold in many pharmacies, but not any skincare product that is based on a plant like Yerba Mate.	Large skincare and personal-care brands are already available in supermarkets, making competition higher.	Competitors also sell skincare online, but our sustainable use of yerba mate residue can help differentiate the product.
Management Experience	We would need to manage inventory, retailer relationships, restocking, and orders from pharmacies.	We would need strong inventory management, transportation, and coordination with supermarkets.	We would need to manage online orders, inventory, payments, deliveries, and customer service.
Staffing Capabilities	Additional staff may be needed to manage deliveries, and restocking.	Additional staff would likely be needed for transportation, packaging the products, and inventory management.	Our team could manage online orders, packaging, customer service, and delivery coordination.

Marketing Needs	We would need promotional materials inside pharmacies and possibly social media campaigns directing customers to these locations.	Promotions, displays, and social media would be important to attract customers among many competing products.	Social media, influencers, educational content, and promotional campaigns could direct customers to the website, this also allows us to explain the sustainability benefits of reusing yerba mate residue.

Pronóstico de Venta de 12 meses/ 12-month sales forecast

Para la proyección de nuestras ventas hemos tenido en cuenta el punto de equilibrio que fue de 1.078 unidades, además hemos estimado un aumento en las ventas mensuales en una escala de 10 unidades por mes y el precio estimado para la comercialización es de 70.000 Gs. por unidad. Esta proyección nos sirve para conocer los posibles ingresos que tendría la comercialización de nuestro producto.

En el siguiente cuadro presentamos las ventas por el mes de enero y total por el periodo de un año.

Presupuesto de Ventas			
N°	**Producto**	**Proyección de Ventas**	
		Mensual en Gs.	**Anual en Gs.**
1	EXFOLIANTE EN BARRA		
	Cantidad Vendida	1.078	13.594
	Precio x Unidad	70.000	70.000
	Total Gs.	75.449.541	951.594.498

Plan Operativo

Producción

El desarrollo de nuestra barra exfoliante comenzará con la creación de una fórmula adaptada a nuestro concepto de producto, en colaboración con un profesional de la cosmética. Una vez lista la fórmula, la producción será realizada por un laboratorio especializado. Tras su fabricación, las barras se almacenarán en un lugar limpio, fresco y seco hasta que estén listas para su venta. La fórmula combinará cera de abeja, aceite de jojoba, yerba mate, ácido salicílico, Vitamina E y talco neutro. En conjunto, estos ingredientes conferirán al producto su textura característica y sus propiedades exfoliantes

Control de calidad

Comprobar que todos los ingredientes cumplan con los estándares de calidad requeridos. Verificar las proporciones correctas de cada ingrediente en la fórmula. Revisar la textura, la consistencia y el aspecto de cada lote. Verificar que la barra exfoliante tenga el peso y la forma correctos. Asegurar de que el área de producción y los equipos estén limpios y debidamente desinfectados.

Ubicación

1. Ubicación: Barrio La Encarnación, Asunción – Edificio Ita Ybaté.
2. Tamaño del lugar: 80 m² aproximadamente.
3. Tipo de edificio: Oficina.
4. Características de la propiedad:
   - Ubicada en el primer piso del edificio Ita Ybaté.
   - Distribuida en 4 ambientes amplios.
   - Espacios funcionales, ideales para oficinas, estudios profesionales o equipos de trabajo.
   - 2 baños.
5. Accesibilidad:

Excelente ubicación en el barrio La Encarnación, en pleno centro de Asunción, con acceso a los principales puntos de la ciudad y a servicios de la zona.

6. Costos:
   - Alquiler mensual: G. 2.600.000
   - Expensas incluidas.

7. Servicios y comodidades:

- 4 ambientes amplios.
- 2 baños.
- Primer piso.
- Espacios funcionales para actividades administrativas y profesionales.
- Ubicación céntrica y estratégica.
- Ideal para empresas, estudios profesionales u oficinas.

Detalles adicionales:

La propiedad ofrece una alternativa práctica para quienes buscan instalar una oficina en una zona céntrica de Asunción, con ambientes amplios y una distribución funcional.

Superficie aproximada: 80 m².

Precio de alquiler: G. 2.600.000 mensuales, con expensas incluidas.

Entorno jurídico

Empresa formada bajo el régimen de Sociedad de Responsabilidad Limitada (S.R.L.) Es un tipo de empresa formada con la sociedad de cinco socios, donde la participación de los mismos se divide en 100 cuotas iguales por valor de 400.000 Gs cada uno. La cantidad de socios no podrá ser mayor de 25 (veinte y cinco). Todos los socios responden ante las obligaciones sociales sólo hasta el valor de sus aportes.

La denominación social debe llevar los términos “Sociedad de Responsabilidad Limitada” o su sigla (S.R.L.). Su omisión hará responsable ilimitada y solidariamente al gerente por los actos que realice en esas condiciones.

Esta sociedad no está habilitada para realizar operaciones bancarias, de seguro, de capitalización y ahorro, ni aquellas para las cuales las leyes exijan otra. El capital social debe estar totalmente suscripto y por lo menos el 50% debe estar integrado en dinero efectivo, completándose la integración en un plazo no mayor de dos años.

No hay requisito de capital mínimo pero éste debe ser suficiente para cumplir con el objeto que se proponga la SRL.

El capital social puede ser incorporado también en especie o en activos fijos, que deberán ser transferidos a nombre de la sociedad en el documento de constitución o bien una vez que el contrato social haya sido inscripto en el Registro Público de Comercio. Los socios continúan siendo responsables solidariamente ante terceros por el valor de los bienes y activos en especie incorporados como capital.

La S.R.L. podrá operar una vez que el contrato social haya sido inscripto en el Registro Público de Comercio, previa protocolización.

El proceso de gestión o administrativo resulta en un pedido realizado por el Escribano Público quien presentará una nota firmada por el representante legal de la Sociedad al Juez de Turno en lo Civil y Comercial.

Tuvimos en cuenta para la formalización cumplir con los siguientes pasos para la apertura de una Sociedad de Responsabilidad Limitada.

Trámites para la apertura de una SRL

1- Recurrimos a la Escribanía para la Constitución por Escritura Pública
2- Depositamos el capital en concepto de Garantía en el Banco Nacional de Fomento.
3- Inscripción en Reg. Público de Comercio y en el Registro de personas jurídicas y asociaciones.
4- Publicación de la Constitución de la Sociedad.
5- Inscripción en la DNIT para obtención del R.U.C.
6- Matrícula de Comerciante.
7- Rubricar los libros contables exigidos.
8- Inscripción Municipal y Solicitud de Patente Comercial.
9- Inscripción Patronal I.P.S.
10- Inscripción Patronal M.T.E.S.S.
11- Registro de Marca D.I.N.A.P.I.

Algunas Obligaciones fiscales

IVA: es un impuesto que grava cada una de las fases de la comercialización del bien hasta que llegue al consumidor final, pero no grava el importe total de cada venta en forma independiente sino como su nombre lo indica, exclusivamente sobre el valor añadido en cada etapa por cada agente económico. Se liquida mensualmente y se determina por la diferencia entre el débito fiscal y crédito fiscal. Tasa: 10%

IRE: Es la abreviatura que se utiliza para referirse al Impuesto a la Renta Empresarial. Es un Impuesto establecido por ley, para aquellas personas que se dediquen a la realización de actividades en forma de empresas, ya sea a través de un particular o una sociedad. Su liquidación se hace luego de terminado el año. Tasa: 10% sobre la utilidad antes de impuestos

IDU: gravará las utilidades, los dividendos o los rendimientos, puesto a disposición o pagados a personas físicas o jurídicas residentes o no. Se liquida al momento que se decida la distribución de los dividendos o utilidades. Tasa: 8% para residentes y 15% para no residentes

Patente comercial: este tributo se abona a la municipalidad donde se encuentre la propiedad que se alquila. Es un impuesto que debe pagar todo aquél que desee ejercer o ejerza una actividad lucrativa, ya sea industrial, comercial o profesional. El mismo se aplica tanto a personas naturales que inician una actividad, como a empresas.

Personal

Cargo	**Gerente General (CEO)**	**Secretaria General**	**Gerente de Administración**	**Gerente de Producción**
Funciones	Liderar la empresa. Representar la marca. Tomar decisiones importantes de negocio. Definir metas y estrategias de ventas.	Organizar reuniones. Redactar y archivar documentos. Organización y gestión del tiempo Redacción y archivo Confidencialidad	Resolución de problemas Gestión de personal Planificación y presupuestos	Conocimientos básicos de producción de exfoliantes Control de Calidad

	Liderazgo y toma de decisiones		Habilidades organizativas	Innovaciones en fórmulas

Inventario

La materia prima que necesitamos para la elaboración de nuestro producto es de fácil adquisición y es por ello que hemos optado por mantener un stock mínimo de 10 unidades por mes. Nuestro producto no necesita de refrigeración, pero si de un almacenamiento que cumpla con los estándares de higiene y salubridad.

En caso de necesitar un tipo de refrigeración entonces aclaramos que necesitamos mantener los ingredientes o productos refrigerados a x temperatura hasta su comercialización.

Teniendo en cuenta que la materia prima posee buena disponibilidad y siendo un producto orgánico o natural o sin químicos hemos planificado una producción mensual de tal forma a no necesitar contar con un stock de materia prima muy alto. Nuestro producto una vez listo tendrá un vencimiento de x tiempo. En el siguiente cuadro proyectamos las compras de materia prima por el periodo de 1 año.

Presupuesto de compra de materia prima						
Inventario:	Yerba mate	Cera de abeja	Ácido salicílico	Talco Neutro	Vitamina E	Aceite de Jojoba

Proveedores

Según la investigación en el sector industrial es común conseguir financiamiento es por ello que hemos proyectado un plan de pago a crédito siendo una referencia abonar el 60% al contado y el saldo a 30 días. O de igual forma podríamos conseguir un préstamo bancario. En el siguiente cuadro proyectamos un plan de pago a los proveedores.

Política de crédito

Hemos proyectado que las ventas sean al contado, pero estaríamos dispuestos a financiar, previo análisis económico a nuestros clientes

Management Worksheet

Bio/s	Juanma Orue – General Manager: Leads the company, coordinates all departments, and makes important business decisions. Antonella Bedoya – Sales & Marketing Manager: Responsible for promoting the product, managing sales strategies, and communicating with customers. Dora Costas – Social Media Manager: Creates and manages social media content and helps increase the company's online presence. Sofia Nuñez – Administrative Manager: Organizes the company's administrative activities and coordinates internal operations. Alexia Segales – Accountant: Manages financial records, expenses, budgets, and basic accounting tasks. Marco Domaniczky – Secretary: Handles documentation, schedules, meetings, and communication within the company. Bruno Riveiro – Cleaner: Maintains cleanliness and hygiene in the workplace. Giuliana Benitez – Production Manager: Supervises the production process and ensures that products are made efficiently and correctly. Sofia Nuñez – Production Assistant: Supports the production manager with preparation, organization, and quality control.
Gaps in Management or Experience	As a young startup team, members may have limited experience in professional business management, accounting, large-scale production, and digital marketing. The team will address these gaps through research, training, teamwork, and advice from experienced professionals.
Advisors	Our technical subject teachers from BATAN, from Marketing, Business, Economics, Language Arts, Accounting, IT, and of course Science and Math helped us by mentoring us throughout the whole process of creation and research of our project.

Organization Chart

Category	General Manager	Administrative Manager	Accountant
Job Responsibilities	Run the company and set main goals. Supervise team managers. Make key business decisions.	Organize daily office work. Track suppliers and inventory. Coordinate communication between teams.	Keep track of money coming in and out. Prepare Taxes and payroll. Create simple financial reports.
Duties	Set goals for every department. Check manager performance. Approve big budgets and plans.	Keep office routines running smoothly. Order suppliers when needed. Help teams work together.	Fill out tax forms correctly. Pay worker salaries on time. Double-check bank records.
R/P Education	Degree in Business, Management, or related fields.	Degree in Business Administration or related field.	Degree in Accounting or Finance.
R/P Experience	5+ years in management or leadership	2+ years in office or admin work.	1-2 years in basic accounting work.

R/P Skills	Team leadership & staff management. Fast decision-making. Long-term planning.	Office software Strong organizational skills. Quick problem-solving.	Excel or accounting software. Express tracking & budgeting. Basic tax rule knowledge.

Gastos Iniciales y Capitalización

- Gastos de puesta en marcha

  Para poner en marcha nuestra empresa necesitamos:

  1. Realizar los pagos correspondientes a los gastos de apertura.
  2. Alquilar un local que esté ubicado dentro del departamento Central.
  3. Comprar los muebles y equipos necesarios, como escritorios, sillas, mesa de trabajo, estantes y utensilios de cocina. También necesitamos realizar algunas instalaciones y adquirir las máquinas para elaborar nuestro producto, como una trituradora, un y un refrigerador.
  4. Comprar todos los materiales e ingredientes necesarios para comenzar con la elaboración de nuestro producto.

Balance del día de apertura

Presupuesto de Costo del Producto				
Concepto	**Unidad de Medida**	**Cantidad**	**Precio Unitario**	**Total**
Materia Prima	UNIDAD	1,078	29,654	31,962,581
Mano de Obra			4,221	4,549,607
Costos Indirectos			3,142	3,386,280
Total Costo				39,898,469
Total Costo Unitario				37,017

Para la MP se tuvo en cuenta el aceite de jojoba, la vitamina E, ácido salicílico, cera de abeja, yerba mate y el talco neutro. En MOD se considera los salarios y cargas sociales que se abonaría al confeccionista y en Costos indirectos se tuvo en cuenta el salario y cargas sociales del jefe de producción y del encargado de control de calidad.

Plan Financiero

- Proyección de pérdidas y ganancias a 12 meses

  Al cerrar nuestro primer año de trabajo, proyectamos una utilidad neta de Gs. 31.960.988.

ReLeaf	
ESTADO DE PERDIDAS Y GANANCIAS	
VENTAS	951,594,498 ₲

Balance proyectado

En esta proyección podemos visualizar como queda conformado el patrimonio de la empresa al finalizar el periodo de 1 año.

BALANCE GENERAL	
ReLeaf S.R.L	
ACTIVO	
DISPONIBILIDADES	145,080,101
CREDITOS	2,600,000
MATERIA PRIMA	395,479
ACTIVO FIJO	98,845,500
CARGOS DIFERIDOS	4,550,000
TOTAL ACTIVO	251,471,081
PASIVO Y PATRIMONIO NETO	
PROVEEDORES	14,089,809
IRE A PAGAR	3,738,127
CAPITAL	200,000,000
RESERVAS	1,682,157
RESULTADO	31,960,988
TOTAL PASIVO Y PN	251,471,081

Cálculo del punto de equilibrio – Break-even analysis

Calculo de punto de Equilibrio

*P*e= Costo fijos/ (Precio por unidad- Costo variable por unidad)

$$\frac{43.486.960}{70.000 - 29.654} = 1.078 \text{ unidades}$$

ReLeaf's break-even point is 1.078 units, meaning that at this level of sales, all fixed and variable costs are fully covered. Any sales above 1.078 units will begin to generate profit, showing that reaching and exceeding this sales target is essential for the company's profitability.

Uso del capital

EL proyecto será financiado 100% con fuente propia. A continuación, se presenta el cuadro de la inversión total.

Presupuesto de Inversión			
Inversiones	Propia	Terceros	Total
Activo Fijo			
Muebles y Equipos	19.596.000	-	98.845.500
Instalaciones	66.045.000	-	
Equipos de Informática	9.660.000	-	
Maquinarias y Equipos	3.544.500	-	
Inversión Pre Operativa			
Gastos de Apertura	4.550.000	-	4.550.000
Capital de Trabajo			
Gastos Operativos	43.486.960	-	71.812.441
Caja Chica	500.000	-	
Costo del Producción	19.355.473	-	
Imprevistos	8.470.008	-	
Inversión total en Gs.			200.000.000

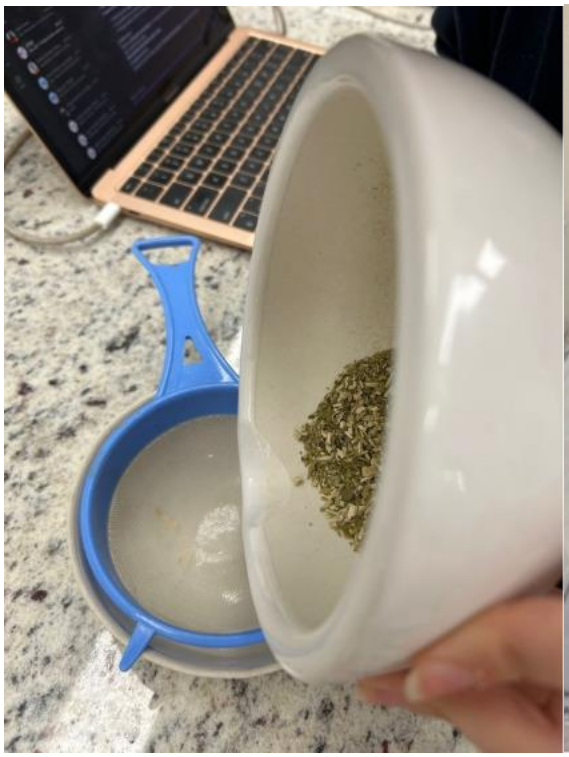

Nuestra Inversión total es de Gs 200.000.000 que se compone de:

1. Activo Fijo que son los bienes que necesitamos para el funcionamiento de nuestro negocio.
2. La inversión preoperativa se da por los gastos que genera la formalización de la empresa como la escritura de constitución, y los demás tramites en las diversas instituciones.
3. El capital de trabajo es básicamente los recursos financieros que la empresa necesita para continuar funcionando y realizar sus actividades. El capital de trabajo es una herramienta que asegura que el negocio continuará operativo, incluso enfrentándose a una escasez de recursos para pagar sus gastos básicos, y es por eso que es crucial para cubrir los gastos operativos y los costos de producción.
