Executive Summary

PUNTO & LUZ SRL is an eco-sustainable venture that seeks to repurpose discarded glass and mirrors to create handcrafted decorative mirrors, combining pointillism and mosaic techniques. The company aims to transform waste into functional, artistic, and personalized products, thereby promoting responsible consumption and environmental awareness. Its target market consists of men and women over the age of 18—primarily from Asunción and Greater Asunción—belonging to middle, upper-middle, and upper socioeconomic brackets. Sales will be conducted nationwide via online orders placed through WhatsApp, utilizing third-party delivery services. Key competitors include Marketplace, Casa Viva, and Casa Paraná; the company distinguishes itself through product customization, waste repurposing, and artisanal craftsmanship. The project requires an initial investment of Gs. 80,000,000, distributed among five investors making equal contributions of Gs. 16,000,000. Sales are projected to grow from 207 to 425 units per month during the first year, resulting in an accumulated net profit of Gs. 365,450,088 on annual sales of Gs. 690,660,000. Additionally, Gs. 760,000 per month will be allocated to promotional activities.

Resumen Ejecutivo

PUNTO & LUZ SRL es un emprendimiento ecosostenible que busca reutilizar vidrio y espejos desechados para crear espejos decorativos artesanales, combinando técnicas de puntillismo y mosaico. La empresa tiene como objetivo transformar residuos en productos funcionales, artísticos y personalizados, promoviendo así el consumo responsable y la conciencia ambiental. Su mercado objetivo está compuesto por hombres y mujeres mayores de 18 años —principalmente de Asunción y el Gran Asunción— pertenecientes a los estratos socioeconómicos medio, medio-alto y alto. Las ventas se realizarán a nivel nacional mediante pedidos en línea a través de WhatsApp, utilizando servicios de entrega de terceros. Entre los principales competidores se encuentran Marketplace, Casa Viva y Casa Paraná; la empresa se distingue por la personalización de productos, la reutilización de residuos y la elaboración artesanal. El proyecto requiere una inversión inicial de Gs. 80.000.000, distribuida entre cinco inversores que realizarán aportes iguales de Gs. 16.000.000. Se proyecta que las ventas crezcan de 207 a 425 unidades mensuales durante el primer año, lo que resultará en una

utilidad neta acumulada de Gs. 365.450.088 sobre unas ventas anuales de Gs. 690.660.000. Adicionalmente, se destinarán Gs. 760.000 mensuales a actividades promocionales.

Company Description Worksheet

Business Name	Punto & Luz
Company Mission Statement	We seek to promote the use of industrial waste as raw material, prioritizing recycling without losing aesthetics and quality. We also aim to be positioned in the consumer's mind by offering the most competitive prices in the market, designing and creating innovative home decorative mirrors.
Company Philosophy/ Values	We focus on satisfying our customers' expectations by creating an organizational culture based on sustainability and environmental responsibility.
Company Vision	Beautify houses all around the country with colorful hand-made mirrors made from industrial waste. We demonstrate that even discarded waste could be transformed into something valuable and full of meaning.
Goals & Milestones	Becoming top of mind in home decoration market, offering quality, status, aesthetics and competitive prices. We will grow our market share by bringing sustainable design into more homes and commercial spaces, expanding our presence across both digital and physical channels. We aim to build strong consciousness among customers and position ourselves as trusted leaders in eco-friendly design. Our Corporate Social Responsibility for the first year of our company operation is to donate mirrors to schools or educational institutions, especially art classrooms, dance spaces, bathrooms, or creative projects.
Target Market	Our target market is adults between 25 and 45 years old. With a middle-to-high income level.
Industry/ Competitors	Our competitors are companies that produce and sell the same products as us. Some companies are Casa Viva, Market Place y Casa Paraná.
Legal Structure/ Ownership	Punto y Luz operates as an S.R.L., a legal structure that provides limited liability to its partners and allows responsibilities and ownership to be clearly divided among the members of the company.

Products & Services Description

Product/ Service Idea	We create mirrors with decorative and artisanal designs that contain industrial waste, specifically glass. This glass is taken from bottles of glass and scraps from industries. We are trying to give more purity to natural resources and a longer life to materials, this is because recycling includes an industrialized process, but upcycling is reusing a product by combining it with another one in an innovative way. We estimated that we can earn more profit by associating or making contract sales with decorative business, but we are also willingness to increase our market share and send directly to consumers
Special Benefits	The main benefit of our product is that our mirrors try to move away from a linear economy to a circular one. We reuse glass from bottles and industrial scraps that could become waste and give these materials a new purpose. This helps reduce the use of new natural resources and promotes social responsibility. Customers may choose our mirrors instead of traditionalmirrors because they are not only decorative, but they also represent sustainability.
Unique Features	Our mirrors are different from traditional products because they include reused glass in creative and artisanal designs. Each design can have different colors, shapes, and styles depending from where we collect our materials. Our product is eco-friendly because we give a second life to materials that could be considered waste. It is also innovative because we combine decoration with upcycling, creating a product that is useful, attractive, and environmentally responsible.
Limits and Liabilities	One of them is consumer expectations, nowadays sustainable products are not a hundred percent demanded by consumers because they question their quality because of the prices they normally have. Working with glass also can be dangerous because we can’t know with completely certainty that the process the original product had was correct, so we are in charge of verifying the condition of the glass before we work on it.
Production and Delivery	The production starts by collecting glass bottles and industrial glass scraps. The glass will be cleaned, separated, cut, and prepared to be used in the decorative design of the mirrors. After that, the pieces will be combined with the mirror and other materials to create different artisanal designs. The finished product will be inspected and safely packaged. We plan to sell our mirrors directly to consumers and make agreements with

	decorative businesses, construction companies, architects, and interior designers. Customers will also be able to order the products online and receive them through delivery. People would be able to make their own designs, they might have another price, and they will be sold by make-to-order.
Suppliers	Our main materials will come from glass bottles and glass scraps from industries and businesses. We can create agreements with restaurants, bars, hotels, recycling companies, and glass industries to collect materials that they no longer need. We will also need suppliers for mirrors and packaging. Working with local suppliers can help us reduce logistic costs and earn important time.
Intellectual Property Special Permits	Our business will need a brand name and logo to create a clear identity and differentiate our products from competitors. We can register the brand to protect our name and image. A patent may not be necessary for the general idea of creating decorative mirrors with reused glass. The company must make sure that the products are safe for customers and that the materials are correctly handled during production.
Product/ Service Description	Our product is a decorative and artisanal mirror made using reused glass from bottles and industrial scraps. We transform materials that could become waste into attractive and useful products through upcycling. Our goal is to move away from a linear economy and move towards a circular economy, following its main principles of reducing waste, reusing materials, and extending their useful life. Our mirrors combine sustainability, innovation, and design, while reducing the use of natural resources.

Circular Economy

The circular economy is a system where materials never become waste, and nature is regenerated. In a circular economy, products and materials are kept in circulation through processes like maintenance, reuse, and recycling. The circular economy addresses climate change and other global challenges, like biodiversity loss, waste, and pollution.

Its primary advantages include drastical waste reduction, conservation of natural resources, lower carbon emissions, and job creation in repair and recycling sectors.

We will apply circular economy to our project by giving industrial glass waste a second life. Instead of allowing glass scraps from factories to be discarded or sent to landfills, we collect, process, and transform them into high-quality decorative mirrors.

Marketing Plan

Market Research

Figure 1 – Important aspects when buying a mirror.

In Figure 1, people were asked which aspects were most important when buying a mirror. The results showed that the quality of the glass was the most important factor, chosen by 40.7% of consumers, while price and durability were both considered important by 29.6%. These results indicated that the company should focus on using high-quality glass while also offering a durable product at a reasonable Price.

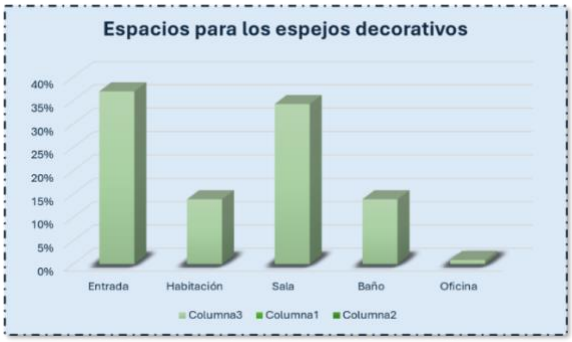

Figure 2 - Spaces for decorative mirrors

In Figure 2, people were asked where they would prefer to place decorative mirrors. The results showed that the entryway was the most preferred space, with approximately 37% of consumers choosing it, followed by the living room with 34%. Bedrooms and bathrooms were each preferred by around 14%, while only 1% selected the office. These results indicated that the company should mainly focus on designing mirrors suitable for entryways and living rooms, as these were the spaces preferred by most consumers.

Figure 3 – Willingness to buy eco-sustainable mirrors.

In Figure 3 people were asked if they were willing to buy mirrors with sustainable or recycled materials. The results showed that the vast majority of the consumers (95%) preferred sustainable ecofriendly products; these results confirmed the choice of the company in focusing on this type of materials considering the manufacturing process.

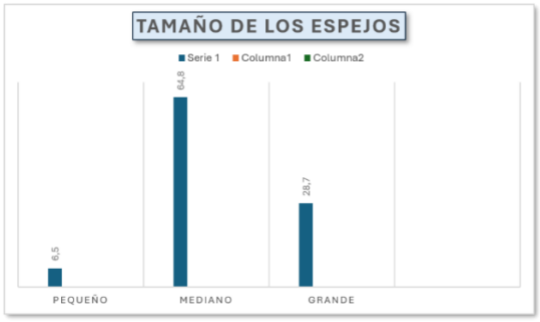

Figure 4 – Mirrors size

In Figure 4, people were asked what size of mirror they would prefer. The results showed that most consumers (64.8%) preferred medium-sized mirrors, while 28.7% preferred large mirrors and only 6.5% preferred small mirrors. These results indicated that medium-sized mirrors would be the most suitable option for the company, as they were the preferred size among most consumers.

Barriers to entry

Some potential barriers we might encounter when entering the market include strong competition from established businesses, low brand recognition, customer loyalty to existing brands, and the costs of promoting our products. Since our company is new, it may take time to gain customers' trust and differentiate ourselves from competitors. However, our sustainable materials, unique designs, and customizable mirrors can help us stand out and attract customers looking for original and environmentally friendly products.

Threats and opportunities

Our company has several opportunities for growth, including the increasing interest in sustainable products, the possibility of offering personalized designs, and the use of online sales to reach more customers. The availability of discarded glass also provides an opportunity to transform waste into valuable and artistic products. However, the project faces threats such as strong competition from businesses like Casa Viva, Casa Paraná, and Marketplace, rising material costs, and the risk of breakage during production or delivery. Additionally, changes in the economy and limited recycling habits could affect the availability of materials and customers' willingness to purchase decorative products.

SWOT Analysis Worksheet

	Strengths	**Weaknesses**	**Opportunities**	**Threats**
Product/ Service Offering	Eco-friendly products made from recycled industrial waste.	We don't make the output control of the products we sell. So, they can have some issues.	If our product is successful, the offering will be easier	Other companies of eco-friendly products have more knowledge about how to offer products to the public
Brand/ Marketing	We can reach the right customers through effective promotion.	We don't invest money on digital marketing, like ads, so we can't choose the	Expanding into new markets by selling our products to new people or locations.	Bigger brands with larger marketing budgets can attract more customers and

		people we want to receive the information and is harder for us to make people receive information about the product.		make it difficult for us to promote our product.
Staff/HR	Good work in group because we help in different tasks to achieve the project's goals.	Some staff lack of experience in some tasks.	Create new job opportunities because our product consists of recycling glass and paste them into mirrors. So, we will give more job opportunities to glass works.	Team members may become unavailable reducing productivity and affecting deadlines.
Finance	We have enough reserves to invest and grow because our product is not so expensive to create.	We don't have the amount of money to do a lot of test products	We can put together money from each member of the group to have a higher capital	If the product is not successful, we are losing all our investment
Operations/ Management	Efficient production processes minimize industrial waste.	Suppliers might delay the delivery of the products.	Development of leadership skills through management training.	Shortages of recycled bottles or production materials can delay manufacturing and delivery.
Market	Strong demand for eco-friendly products.	We are not recognized in the market.	If the product is successful, we are gaining popularity and we are having profit.	Other companies of eco-friendly products have profit and popularity than us and can play a negative role.
Can any of your strengths help with improving your weaknesses or combating your threats? If so, please describe how below.				

Yes. Our teamwork helps us solve problems and improve our products. Our eco-friendly mirrors help us compete with other companies. Also, the high demand for products made from recycled materials can help us become more popular and sell more.
Based on the information above, what are your immediate goals/next steps?
Our immediate goals are presenting our product professionally to the judges and explaining the environmental benefits of our mirrors in the project defense.
Based on the information above, what are your long-term goals/next steps?
Our long-term goals are to expand our product line its eco-friendlier designs.

Factors affecting supply and demand.

Factors affecting Supply	***Measures to control or minimize its effect***
Input costs affect our product supply because if we use expensive resources for producing it, input costs will be affected directly. Labor Productivity: Labor productivity can cause an effect on our product because the more skilled workers we have, the easier and faster our product will be finished, and will help us decrease our cost. Technology: Technology play a huge role in the production of a good, the more technology advances we use for manufacturing the product, we can make our product in a more efficient way	We can control the input costs by calculating the marginal product spent to find the ideal balance between resources. We control labor productivity by setting clear performance benchmarks. Our goal is to maximize outputs per labor hour without sacrificing work quality. Technology will be controlled and well-used because advancements in technology lower production costs. And make our work more efficient, allowing us to supply more at every price point.
Factors affecting Demand	***Measures to control or minimize its effect***

Price: Lower prices usually increase demand, while higher prices may reduce it. Consumer tastes: Demand increases when eco-friendly and handmade decorations become popular. Income: People are more likely to buy decorative products when they have higher disposable income.	The company can minimize the effect of price changes by offering discounts, promotions, and special deals when demand decreases. It can also reduce production costs and use recycled materials to keep prices competitive while maintaining product quality. The company can reduce the impact of changing consumer preferences by regularly researching market trends and customer interests. By creating new designs, improving products, and promoting the eco-friendly and handmade aspects of its decorations, it can stay attractive to consumers. The company can minimize the effect of changes in consumer income by offering products at different price levels. This allows customers with different budgets to continue buying. Seasonal discounts and smaller or simpler product options can also help maintain sales when consumers have less disposable income.

Product/Service features and benefits.

Features	**Benefits**
Recycled glass pieces	Reduces waste and supports sustainability.
Wooden frame	Natural and durable design.
Pointillism and mosaic decoration	Gives the mirror an artistic appearance
Customizable designs	Customers can choose a design according to their preferences
Online ordering	Convenient and easy purchasing

Target customer: Men and women over 18 years old, mainly from Asunción and Greater Asunción, belonging to middle, upper-middle, and high socioeconomic groups, who are interested in decorative products and environmental sustainability.

For consumers: PUNTO & LUZ offers consumers unique, customizable and sustainable decorative mirrors that combine functionality with artistic design. Customers can choose aspects of the design and order their mirrors online.

For businesses: For businesses, PUNTO & LUZ offers customized decorative mirrors that can be used to enhance interior spaces and contribute to an environmentally responsible brand image.

Key competitors: Our key competitors are Marketplace, Casa Viva and Casa Paraná, which offer decorative mirrors and home décor products.

Competitor Data Collection Plan

	Casa Viva	*Market Place*	*Casa Paraná*
Price	Prices revolve around 10 dollars for small mirrors for dresses, around 30 and 50 dollars for middle size mirrors and 80 dollars for big ones. https://www.casaviva.es/?srsltid=AfmBOopd1bCVWuVP3U7PFN9dIFrRUJzcrlwHcvRx8ZHSftKtzpKArQ3q	Prices of middle size mirrors are around 10 to 20 dollars. https://www.marketplace.com.py/	The mirror with led lights is 16,95 dollars. And the big one's different models are around 118.63 and 135.58 dollars. https://tiendanaranja.com.py/marketplace/seller/profile/shop/seller_141299.com?srsltid=AfmBOopjekgxNGAdx2QBAQSL4NpqqADmWC90JaDprP4NxJwFmGGNxhKp
Key features and benefits	Customers can get furniture adapted to their specific needs, space, and preferences.	Customers can choose products that match their preferences and style. At affordable prices.	Customers can satisfy different household needs in a single store. And it has a wide range of affordable prices.
Market presence	1 store located at Avda. San Martín Nuestra Señora del Carmen. 32,1 k followers on Instagram.	1 permanent store in Asunción + 1 seasonal store in San Bernardino. 252 k followers on Instagram.	Has at least 8 official stores in Paraguay. Asunción, Areguá, Caacupé, Capiatá, Lambaré, Luque, etc… 181 k followers on Instagram.
Market strategy	Differentiation and premium-positioning strategy, rather than competing mainly on low prices.	Market strategy based on product variety, competitive promotions and convenience	Casa Paraná uses a mass-market strategy focused on affordable prices, a wide variety of products and frequent promotions.

Competitive Analysis Worksheet

FACTOR					Importance to Customer
	Punto y Luz S.A	**Casa Paraná**	**Casa Viva**	**Marketplace**	**1-5**
Products	Handmade, artistic, recycled and sustainable	Offers a huge variety of products that go from decorations for your house to toys for children	Offers exclusive domestic and imported furniture and high-end decor	Offers a vast variety of home decoration like mirrors, kitchen materials, lamps, furniture, etc…	1 Very important
Price	Affordable compared to other brands -S	Competitive prices that are in accordance with people's budget -S	Decorative products can be more expensive -W	Some low-priced options. But the price varies depending on the product -S	1 Very important
Quality	Carefully selected materials and handmade finish with varnish -S	Established products and brands -S	Quality decorative products -S	Good quality products in all categories -S	1 Very important
Selection	Limited number of models, since it is handmade -W	Very large variety of household products -S	Many decoration styles -S	Extremely large selection -S	2 Important

Reliability	Small business which is starting, so we don't have recognition -W	More than 60 years of experience -S	Established local business -S	Seller reliability varies -W	
Stability	We do not have a lot of stability because our business is new -W	Has established operations -S	Also has established operations -S	Is an established platform -S	2 Important
Expertise	We have the skill to make the products because it is handmade, not everyone can do it, but as a new company, we don't have the same expertise as other businesses -W	Describes itself as an established retail store which experience in household products. -S	It is specialized specifically in furniture and interior decorations -S	It is an actual business focused on home, decoration, furniture and related products.	3 Moderately important
Company Reputation	New brand, still building recognition -W	Well known Paraguayan retailer -S	Established local decoration business -S	Is a recognized local company in which consumers rely on -S	1 Very important
Location	We do not have an established store yet, we make deliveries -W	Multiple locations across Paraguay -S	Physical location in Asunción -S	Physical locations in Paraguay	2 Important

Sales Method	Direct sales and social media or personal orders. -S	Physical stores and online channels -S	Physical stores and online channels -S	Both physical and online stores -S	2 Important
Advertising	New brand with a small audience - W	Established brand and online presence -S	Established social presence -S	Realizes online marketing and also has social presence. -S	2 Important

Positioning/Niche

Our business niche targets environmentally conscious consumers seeking artisanal, high-end home decor. While standard market options force buyers to choose between mass-produced, non-sustainable decor or basic, low-quality recycled items, our brand bridges the gap by offering zero-waste, handcrafted mirrors that do not sacrifice luxury for sustainability. Out of a thousand choices, our products stand out because each mirror is a unique, handcrafted art piece made from high-quality recycled materials, allowing customers to elevate their home aesthetics while actively reducing environmental impact. We position ourselves not just as a sustainable brand, but as a premium interior design choice.

- **Advertising Strategy***:* We will focus our advertising primarily on Online Media, specifically targeted video ads on Instagram, TikTok, and Pinterest.
- **Why***:* Decor purchasing decisions are highly visual, and our core audience frequents visual social platforms for home inspiration.
- **Frequency***:* We will run continuous targeted social ad campaigns 3 to 4 times a week, increasing ad spend during seasonal home-renovation periods (spring and early autumn).
- **Marketing Tactics:** Our primary marketing tactics combine Social Media Marketing, Word-of-Mouth/Referrals, and Content Marketing:
- **Social Media & Content***:* We will post short-form behind-the-scenes videos showing the artisanal process of restoring raw recycled materials into luxury mirrors.

- **Word-of-Mouth & Referrals***:* We will offer a referral discount code ("Share the Glow") giving existing customers 10% off their next purchase when a friend buys a mirror.
- **Business Website & CEO***:* A clean e-commerce store optimized for search terms like "luxury recycled mirrors" and "artisanal eco-decor."
- **Brand Image***:* We want our brand image to project elegance, originality, and environmental responsibility, establishing trust as a luxury brand with an authentic eco-mission.

Design Elements

- *Logo:* A geometric, circular line-art emblem inspired by a flower or sunburst mandating an organic petal layout, featuring a central circular mirror motif encircled by delicate dotted borders. The symmetrical flower petals directly evoke natural growth and sustainability, while the central circle represents a mirror frame, perfectly balancing organic eco-friendliness with geometric, modern elegance.
- *Color Palette:* Deep forest green outlines on a soft, off-white background paired with warm earth tones (beige and terracotta) and subtle gold accents across our branding. The forest green and off-white directly reflect our eco-conscious values, while gold accents project premium quality.
- *Typography & Packaging:* Minimalist serif fonts paired with recycled craft-paper packaging printed in deep green ink, creating an unboxing experience that feels both refined and sustainable.

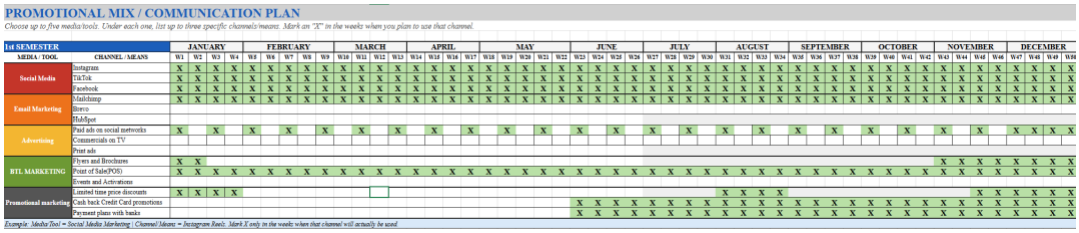

Promotional Budget

Our promotional budget for the mirror business focuses mainly on ongoing marketing activities, with no promotional costs required before startup. The total monthly promotional cost is Gs. 760.000 resulting in an annual promotional budget of Gs. 9.120.000. This budget includes social media advertising, email marketing, and printed flyers and brochures to promote our decorative and sustainable mirrors.

The largest part of the budget is allocated to social media advertising, with approximately Gs. 500.000 per month, because Instagram and Facebook are important channels for reaching our target customers and visually presenting our mirror designs. We also allocate Gs. 130.000 per month to email marketing and Gs. 130.000 to flyers and brochures. These activities will help us increase brand awareness, attract potential customers, communicate promotions, and

support the sales of our mirrors. We decided to give social media advertising the greatest importance because platforms such as Instagram and Facebook are ideal for showing the appearance and uniqueness of our upcycled mirrors through photos and visual content. Email marketing allows us to maintain contact with interested customers and communicate new designs and promotions, while flyers and brochures help us reach people locally and provide information about the product at our point of sale. This combination supports our goal of promoting not only the mirrors themselves, but also their sustainable and circular-economy process.

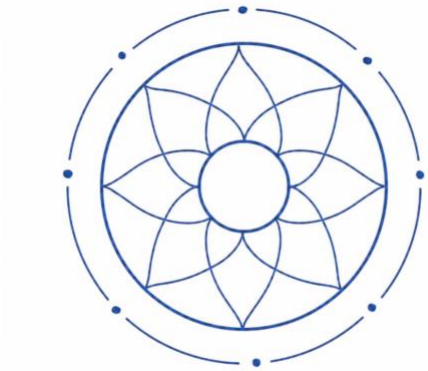

Activity	Before startup	Monthly (ongoing)	Annual
Social media advertising	Gs. 0	Gs. 500.000	Gs. 6.000.000
Email marketing	Gs. 0	Gs. 130.000	Gs. 1.560.000
Flyers and brochures	Gs. 0	Gs. 130.000	Gs. 1.560.000
Total	**Gs. 0**	**Gs. 760.000**	**Gs. 9.120.000**

Brand Identity and Brand Manual

- *Brand name:* Our Brand name is Punto & Luz
- *Creative concept/justification:* The creative concept is turning discarded glass into unique pieces of art and reflection.
- *What the name represents:* The name represents the words “punto” which means pointillism used to decorate the mirrors. And the word “luz” which represents the reflection of light in mirrors and recycled glass.
- *Connection to the product:* Our name is strongly connected to the product because punto relates to pointillism which is the technique we use and luz relates to the reflection and light the recycled glass gives.
- *Connection to target market:* We consider our product name connects with the customers because Punto & Luz relates to the hand-made and sustainability of our product. Which is something that customers nowadays look for a lot.

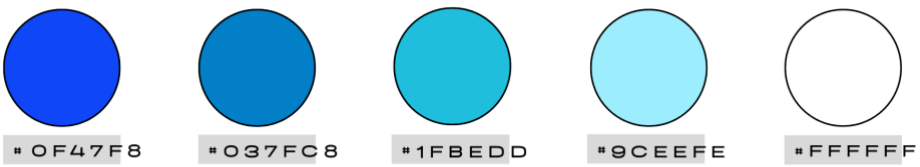

- *Connection to positioning:* The name helps us to position our brand as unique and alternative because we are mixing two fascinating things which are sustainability and art.
- *Short explanation of logo meaning:* The main logo represents a mandala made with circles, points and petals. This is associated with our product because we sell mirrors with hand-made artistic mandalas. In some ways, our logo has everything that our product also has: points, petals and above all, an artistic sight.
- *Short explanation of color choices:* We chose blue color because blue represents calmness, trust, and stability, and that's exactly what we want to transmit with our product.
- *Short explanation of typography choices:* We chose that typography because it helps communicate the creative and artistic personality of Punto y Luz. A distinctive font makes our brand more recognizable instead of making it like any other brand.

Monthly or Annual Expenses	Social media advertising: Gs. 500,000/month	Email marketing: Gs. 130,000/month	Flyers and brochures: Gs. 130,000/month
Labor Costs	No additional labor costs.	No additional labor costs.	No additional labor costs.

Pricing Strategies

Name of the company	Punto y luz	
Which of the pricing strategies are you using?		
Skimming	**Value Based**	**Cost - Plus**

We are going to use the Cost-Plus Pricing strategy because it allows us to determine the selling price by considering the production cost and then adding a profit. For our product, one decorated mirror has an estimated production cost of Gs. 62,000. We plan to sell each mirror for Gs. 180,000, which gives us an estimated profit of Gs. 118,000 per mirror. This represents approximately a 190% markup on the production cost.

Our selling price was chosen not only to cover our production costs, but also to reflect the handmade and decorative value of the product. Our target market is customers who are interested in unique, decorative, and personalized home products and who are willing to pay more for a handmade product.

We also considered the prices of competing decorative mirrors, which can cost around Gs. 200,000 or more. Therefore, our price of Gs. 180,000 allows us to remain competitive while offering a product at a slightly lower price than some similar products.

In terms of positioning, Punto y Luz aims to position its mirrors as unique, handmade, decorative, and high-quality products. Therefore, the Gs. 180,000 price reflects both the production cost and the added value of the design and craftsmanship. Using Cost-Plus Pricing helps us cover our costs, earn a reasonable profit, and maintain a competitive price for our target market.

Distribution Channel Assessment Worksheet

	Distribution Channel 1 **Social Media**	**Distribution Channel 2** Local stores and decoration shops	**Distribution Channel 3** **Online Marketplace**
Ease of Entry	Very easy. Accounts are free, easy to create, and we can start promoting and selling immediately. For example, we create an Instagram account and write our phone number in the bibliography so customers can contact us.	Medium difficulty. We need to contact stores and convince them to sell or display our products.	It is relatively easy to enter because we can create an account and list the mirrors without needing a physical store. This allows us to reach the market with low initial costs. However, there may be many competitors at the web.
Geographic Proximity	We can easily reach our customers from all around the country through social media like Intagram, Whatsapp, Facebook, etc…	These stores could be physically close to our target customers, making it easy for them to see and buy our mirrors.	They allow us to reach customers throughout Paraguay, but delivery is needed because customers may be located far from our business.
Costs	Is the cheapest option because creating	The cost is medium because stores may	The cost is low to medium because it may be cheap,

	accounts and posting products is free. Costs only increase if we use paid advertising or delivery services.	charge a commission or require us to sell the mirrors to them at a lower price. Transportation can also increase costs.	but some platforms charge commissions or transaction fees, and there may also be packaging and delivery costs.
Competitors' Positions	Is strong because many decoration and mirror businesses already promote their products on social media, so we need attractive content and unique designs to differentiate.	Not so strong because many stores sell and offer mirrors, but our decorative hand-made mirrors will differentiate us.	Strong, customers can easily compare our mirrors with many similar products based on price, design, and quality, creating strong competition.
Management Experience	We are familiar with social media, so promoting products, communicating with customers, and managing orders would be relatively easy.	We have low management experience because we have limited expertise negotiating with stores, managing partnerships, and working with retailers.	We can easily learn how to list and promote products online, but managing payments, orders, deliveries, and customer service requires some experience.
Staffing Capabilities	High. Our team can manage posts, answer customer messages, promote mirrors, and receive orders without needing more people to help.	Moderate. We would need team members and help from external people to contact stores and deliver products.	Moderate. Our team can manage online listings and orders, but packaging, deliveries, customer service, and keeping product information updated require additional time and organization.
Marketing Needs	We need frequent posts, attractive photos, videos, and promotions to gain attention and keep customers interested and also to differ from	The store already attracts customers, so less direct promotion is needed, although attractive displays and product information are important.	We need good product photos, clear descriptions, competitive prices, and positive customer reviews to make our mirrors stand out from competitors.

	sellers who are doing the same.		

Descripción de la Empresa

PUNTO & LUZ SRL es una empresa paraguaya dedicada a la elaboración y comercialización de espejos decorativos artesanales y personalizados, utilizando vidrio y espejos recuperados como parte de sus diseños. La empresa combina técnicas de puntillismo y mosaico con marcos de madera para transformar materiales descartados en piezas funcionales, artísticas y únicas.

Estructura Jurídica

PUNTO & LUZ se constituirá como una Sociedad de Responsabilidad Limitada, con un capital social de Gs. 80.000.000, dividido en 100 cuotas iguales de Gs. 800.000 cada una, cuyo aporte por socio será de la siguiente manera:

· Socio 1: Paula Garelik — 20 cuotas de Gs. 800.000, equivalentes a Gs. 16.000.000.

· Socio 2: Facundo González — 20 cuotas de Gs. 800.000, equivalentes a Gs. 16.000.000.

· Socio 3: Ana Paulha Torres — 20 cuotas de Gs. 800.000, equivalentes a Gs. 16.000.000.

· Socio 4: Massimo Bo — 20 cuotas de Gs. 800.000, equivalentes a Gs. 16.000.000.

· Socio 5: Raissa Urunaga — 20 cuotas de Gs. 800.000, equivalentes a Gs. 16.000.000.

El capital social será integrado en su totalidad en dinero en efectivo. Esta sociedad tendrá como finalidad la venta de productos decorativos, siendo su ubicación de casa central en Fernando de La Mora Zona Norte.

Se eligió este tipo de Sociedad por las siguientes características:

- No existe un monto mínimo de capital requerido.
- La responsabilidad de los socios está limitada al monto de sus aportes.
- Es menos costosa que otras formas de sociedades.

Plan Operativo

Entorno Jurídico:

Empresa formada bajo el régimen de Sociedad de Responsabilidad Limitada (S.R.L). Es un tipo de empresa formada con la sociedad de dos o más socios, donde la responsabilidad de dichos se limita exclusivamente al monto del capital o dinero que hayan aportado. La cantidad de socios no podrá excederse de 25 (veinte y cinco). Todos los socios responden ante las obligaciones sociales sólo hasta el valor de sus aportes.

PUNTO & LUZ se constituirá como una Sociedad de Responsabilidad Limitada (S.R.L.), por lo que su nombre deberá llevar las palabras "Sociedad de Responsabilidad Limitada" o las siglas "S.R.L.". Este tipo de sociedad no puede realizar actividades bancarias, de seguros, de capitalización y ahorro, ni otras actividades que por ley necesiten un tipo diferente de sociedad. Para constituirla no existe un monto mínimo de capital establecido, pero el capital debe ser suficiente para poder llevar a cabo las actividades de la empresa. El capital debe estar totalmente suscripto por los socios y, si el aporte se realiza en efectivo, al menos el 50% debe ser integrado al momento de la constitución, mientras que el resto puede completarse en un plazo máximo de dos años. También se pueden aportar bienes o activos fijos, como muebles, máquinas o equipos, los cuales deben pasar a nombre de la sociedad. Una vez realizado el proceso de constitución, la S.R.L. podrá comenzar a operar legalmente después de que el contrato social sea protocolizado e inscripto en el Registro Público de Comercio.

Para formalizar la empresa PUNTO & LUZ se deben realizar varios trámites. Primero, se recurre a una escribanía para realizar la constitución de la sociedad mediante una Escritura Pública. Luego, se deposita el capital correspondiente en el Banco Nacional de Fomento (BNF), como parte del proceso de constitución. Después, se realiza la inscripción de la sociedad en el Registro Público de Comercio y en el Registro de Personas Jurídicas y Asociaciones, además de realizar la publicación correspondiente de la constitución de la empresa. Posteriormente, se realiza la inscripción en la DNIT para obtener el RUC, que permitirá a la empresa cumplir con sus obligaciones tributarias. También se debe obtener la Matrícula de Comerciante y rubricar los libros contables necesarios para registrar las operaciones de la empresa. Además, se realiza la inscripción en la Municipalidad correspondiente y se solicita la patente comercial. En caso de contar con trabajadores, la empresa debe inscribirse como empleadora en el IPS y en el MTESS. Finalmente, se puede

registrar la marca PUNTO & LUZ ante la DINAPI y, dependiendo de la actividad que realice la empresa, también pueden ser necesarios otros registros o permisos, como los del INAN o MADES.

En cuanto a las obligaciones fiscales, PUNTO & LUZ deberá cumplir principalmente con el IVA, el IRE y, cuando corresponda, el IDU. El IVA es un impuesto que se aplica a la venta de bienes y servicios y se liquida mensualmente, teniendo en cuenta la diferencia entre el IVA cobrado en las ventas y el IVA pagado en las compras. Su tasa general es del 10%. El IRE es el impuesto que pagan las empresas sobre las ganancias obtenidas durante el desarrollo de sus actividades y, en general, tiene una tasa del 10% sobre la renta neta. Por otro lado, el IDU se aplica cuando la empresa distribuye sus utilidades o dividendos entre los socios, siendo la tasa del 8% para residentes y del 15% para no residentes. Además, la empresa deberá pagar la patente comercial a la Municipalidad correspondiente, ya que este tributo es necesario para poder desarrollar legalmente una actividad comercial.

- *Inventario*

Hemos optado por ir aumentando el stock inicial por mes porque las materias primas que necesitamos para la elaboración de nuestros productos no son complicadas de obtener. Nuestro producto requiere almacenamiento que cumpla con los estándares de higiene y salubridad y refrigeración.

Hemos planificado una producción anual para evitar tener una gran cantidad de materia prima, ya que la materia prima es fácilmente accesible y el producto es orgánico y sin químicos.

- *Proveedores*

Según la investigación en el sector industrial es común conseguir financiamiento es por ello por lo que hemos proyectado un plan de pago a crédito siendo una referencia abonar el 60% al contado y el saldo a 30 días

Management Worksheet

	I am Paula Garelik. Co – Founder of Punto & Luz S.R.L I was born in Asunción, Paraguay, on April 5th 2009. I am currently studying a Business Administration Baccalaureate at San Ignacio de Loyola School, located in Asunción, Paraguay. I became conscious of environmental problems thanks to the education I receive in school. This motivated me to think about a product that could transform waste that would otherwise be discarded into something beautiful and full of meaning. From that idea, the concept of sustainable decorative mirrors was created.
Gaps in Management or Experience	During this school year, I worked in the Treasury Department at the Interescolar SIL 2026. This job taught me to be more responsible, to manage time and to work with my classmates. It also showed me how to control and administer money properly.
Advisors	• Prof. Ada Espínola • Prof. Maryann Wright • Prof. María Felicia Gorostiaga • Prof. Lourdes Aveiro • Prof. Marian González • Prof. Soledad Gomez • Profe. Lilian Verón • Dra. Carmen Jiménez • Lic. Liz Cristaldo
	I am Ana Paulha Torres. Co – founder and production manager of Punto & Luz S.R.L. I was born in Asunción Paraguay, on October 18th 2009. I am currently studying a Business Administration Baccalaureate at San Ignacio de Loyola School, located in Asunción, Paraguay. I became conscious of environmental problems through the education I receive at school and began to understand the importance of finding creative ways to reduce waste. When my classmate shared her idea of creating sustainable decorative mirrors using discarded glass, I immediately accepted the idea. I saw an opportunity to create something beautiful and meaningful while also giving waste a second life. From this shared idea, Punto & Luz was born.
Gaps in Management or Experience	During this school year, I worked in the Communication Department at the Interescolar SIL 2026. This job taught me to be more responsible, to manage time and to work in groups and respect other peoples' opinions.

	I am Raissa Urunaga, Co-Founder and Commercial Manager of Punto & Luz S.R.L. I was born in Asunción, Paraguay, on May 20th, 2010. I am currently studying a Business Administration Baccalaureate at San Ignacio de Loyola School, located in Asunción, Paraguay. I became conscious of environmental problems through the education I receive at school. When the idea of creating sustainable decorative mirrors was presented, I decided to support the process of making the mirrors and contribute to turning the idea into a real product.
Gaps in Management or Experience	During this school year, I worked as a Sports Assistant at the Interescolar SIL 2026. This experience taught me how to be responsible, organized, and supportive when working with others. It also helped me develop teamwork and communication skills, which I was able to apply while working with my classmates on Punto & Luz.
Advisors	• Prof. Ada Espínola • Prof. Maryann Wright • Prof. María Felicia Gorostiaga • Prof. Lourdes Aveiro • Prof. Marian González • Prof. Soledad Gomez • Profe. Lilian Verón • Dra. Carmen Jiménez • Lic. Liz Cristaldo
	My name is Massimo Bo, Co- Founder and Administrational Manager of Punto & Luz S.R.L. I was born in Asunción, Paraguay, on May 20th, 2010. I am currently studying a Business Administration Baccalaureate at San Ignacio de Loyola School, located in Asunción, Paraguay. During this project I supported the product and gave ideas.
Gaps in Management or Experience	During this school year, I participated as a Sports Assistant at the Interescolar SIL 2026. This experience helped me improve my organization, responsibility, and ability to work as part of a team. It also taught me how to communicate effectively and support others, skills that became useful while working with my classmates on Punto & Luz.

	I am Facundo González, Co – Founder and Financial Manager of Punto & Luz S.R.L. I was born in Asunción, Paraguay, on May 20th, 2010. I am currently studying a Business Administration Baccalaureate at San Ignacio de Loyola School, located in Asunción, Paraguay. Throughout this project, I supported my classmates and carried out the accounting part. I calculated the costs, profits and break-even point. I kept track of income and expenses, organized payments, managed the budget, and helped make sure the company can meet its financial obligations.

Organizational Chart

Gastos Iniciales y Capitalización

Balance del día de apertura

Para la apertura de la empresa es necesario considerar una serie de inversiones y gastos esenciales. Según el plan de inversiones, los principales rubros son:

- *Alquiler del local:* el costo mensual del alquiler será de **Gs. 2.420.000**. Además, se deberá pagar una garantía inicial de **Gs. 2.420.000**.
- *Muebles y equipos:* se adquirirán una mesa de trabajo, cinco sillas de plástico, tres estanterías para materiales, un teléfono, seis spots LED, cinco escritorios y dos mesas plegables. El costo total será de **Gs. 6.318.000**.

- *Instalaciones:* para garantizar la seguridad y comodidad del local se comprarán un extintor y dos equipos de aire acondicionado. La inversión total será de **Gs. 4.448.000**.

*Equipos de informática: para la gestión administrativa se contará con una computadora Acer y una impresora multifunción. El costo total será de **Gs. 2.246.000**.*

*Maquinarias y equipos: el presupuesto actual no contempla la compra de maquinarias adicionales, por lo que este rubro tendrá inicialmente un valor de **Gs. 0**.*

- *Gastos de formalización:* los honorarios de escribanía serán de **Gs. 660.000**, los impuestos y tasas de **Gs. 220.000** y la gestión de inscripción de **Gs. 1.650.000**. En total, los gastos de apertura ascenderán a **Gs. 2.530.000**.

- *Otros gastos administrativos:* la patente comercial, los servicios básicos, los artículos de limpieza, los útiles de oficina, el mantenimiento y el servicio de internet representarán conjuntamente **Gs. 909.400**.

La empresa contará con un capital inicial de **Gs. 80.000.000**, destinado a cubrir estas inversiones, los costos de producción, los recursos humanos, la caja chica y los posibles imprevistos.

Estado financiero personal

Cada uno de los cinco inversionistas realizará un aporte de **Gs. 16.000.000**, equivalente al **20% del capital inicial**. Por otra parte, según las proyecciones financieras del proyecto, la empresa obtendrá durante su primer año una utilidad neta acumulada de **Gs. 365.450.088**.

Plan Financiero

Proyección de pérdidas y ganancias a 12 meses

El cuadro de pérdidas y ganancias nos proyecta que resultado económico obtendríamos por el periodo de un año.

Según los datos que generamos con el proyecto en el primer año tendríamos una utilidad neta de Gs. 365,450,100

Vitality S.R.L

Descripción de los componentes de cada cuenta

Presupuesto de Costo: Luces LED a pila

Concepto	**Unidad de medida**	**Cantidad**	**Precio unitario**	**Total**
Materia Prima: Luces LED a pila	Unitario	1.483	₲ 3.360	₲ 4.982.880
Mano de Obra Directa	—	—	—	—
Costos Indirectos	—	—	—	—
Total Costo	—	—	—	**₲ 4.982.880**
Total Costo Unitario	—	—	—	**₲ 3.360**

Presupuesto de Costo: Pintura

Concepto	**Unidad de medida**	**Cantidad**	**Precio unitario**	**Total**
Materia Prima: Pintura	Juego	135	₲ 30.400	₲ 4.104.000
Mano de Obra Directa	—	—	—	—
Costos Indirectos	—	—	—	—
Total Costo	—	—	—	**₲ 4.104.000**
Total Costo Unitario	—	—	—	**₲ 30.400**

Presupuesto de Costo: Madera

Concepto	**Unidad de medida**	**Cantidad**	**Precio unitario**	**Total**
Materia Prima: Madera	Pieza	2.645	₲ 21.000	₲ 55.545.000
Mano de Obra Directa	—	—	—	—
Costos Indirectos	—	—	—	—
Total Costo	—	—	—	**₲ 55.545.000**
Total Costo Unitario	—	—	—	**₲ 21.000**

Presupuesto de Costo: Espejo

Concepto	Unidad de medida	Cantidad	Precio unitario	Total
Materia Prima: Espejo	Unidad	2.645	₲ 6.400	₲ 16.928.000
Mano de Obra Directa	—	—	—	—
Costos Indirectos	—	—	—	—
Total Costo	—	—	—	**₲ 16.928.000**
Total Costo Unitario	—	—	—	**₲ 6.400**

Presupuesto de Costo: Papel madera

Concepto	Unidad de medida	Cantidad	Precio unitario	Total
Materia Prima: Papel madera	Por rollo	2.645	₲ 300	₲ 793.500
Mano de Obra Directa	—	—	—	—
Costos Indirectos	—	—	—	—
Total Costo	—	—	—	**₲ 793.500**
Total Costo Unitario	—	—	—	**₲ 300**

Uso del capital

El proyecto será financiado completamente con fuentes propias. A continuación, se presenta la composición de la inversión total:

Nuestra inversión total se compone de:

Activo fijo: son los bienes que adquirimos para utilizarlos de manera permanente en nuestra empresa. Incluye los muebles y equipos, las instalaciones y los equipos informáticos necesarios para el funcionamiento del negocio.

Inversión preoperativa: son los gastos iniciales que realizamos antes de comenzar nuestras operaciones. Estos gastos son necesarios para la planificación y formalización del

negocio, como los trámites legales, los honorarios profesionales, los impuestos y la inscripción de la empresa.

Capital de trabajo: es el dinero que necesitamos para operar de manera continua y realizar nuestras actividades diarias. Este capital incluye los recursos necesarios para cubrir la compra de materia prima, el pago de salarios, los servicios básicos, los gastos administrativos, la publicidad y otros costos operativos.

Presupuesto de Inversión			
Inversiones	**Propia**	**Terceros**	**Total**
Activo Fijo			
Muebles y Equipos	6,318,000	-	6,318,000
Instalaciones	4,448,000	-	4,448,000
Maquinarias y equipos	-	-	-
Equipos de Informática	2,246,000	-	2,246,000
Inversión Pre Operativa			
Gastos de Apertura	2,530,000	-	2,530,000
Capital de Trabajo			
Gastos Operativos	25,009,400	-	25,009,400
Caja Chica	1,000,000	-	1,000,000
Costo del servicio	3,883,620	-	3,883,620
Imprevistos	33,111,860	-	33,111,860
Inversión total en Gs.	**78,546,880**		**78,546,880**
