Executive Summary (English)

1. Business Overview

Origo S.R.L. is a sustainable furniture company that creates stylish and functional tables using resin and recycled fabrics. Our goal is to transform discarded materials into valuable products while promoting sustainability.

2. Product and Customer Problem

Our main product is a durable table made with resin and recycled fabrics. It addresses textile waste and the demand for sustainable furniture by giving discarded fabrics a new purpose while offering customers a unique design.

3. Business Goals

In the first year, we aim to develop our prototype, establish the brand, and attract customers. Within three years, we plan to expand our products and improve production. Within five years, we aim to become a recognized sustainable furniture brand.

4. Target Market

Our target market is mainly people aged 18–40 with middle incomes who value modern designs, durability, creativity, and environmental sustainability.

5. Competition and Competitive Advantage

Origo S.R.L. competes with traditional, customized, and sustainable furniture businesses. Our advantage is combining resin and recycled fabrics to create unique, modern, and environmentally responsible tables.

6. Management Team

Our team will manage production, design, marketing, finances, and customer relations. Creativity, teamwork, and problem-solving will support the company's development.

7. Financial Outlook

Origo S.R.L. will control production costs while maintaining quality. Profits will be reinvested into production, new designs, and marketing as the company grows.

Overall, Origo S.R.L. combines innovation and environmental responsibility by transforming discarded fabrics into stylish, functional, and sustainable furniture.

Executive Summary (Spanish)

1. Descripción general de la empresa

Origo S.R.L. es una empresa de mobiliario sostenible que crea mesas elegantes y funcionales utilizando resina y telas recicladas. Nuestro objetivo es transformar materiales desechados en productos valiosos, promoviendo la sostenibilidad.

2. Producto y problema del cliente

Nuestro producto principal es una mesa duradera fabricada con resina y telas recicladas. Aborda el problema de los residuos textiles y la demanda de mobiliario sostenible, dando una nueva vida a las telas desechadas y ofreciendo a los clientes un diseño único.

3. Objetivos de la empresa

Durante el primer año, nuestro objetivo es desarrollar nuestro prototipo, consolidar la marca y atraer clientes. En un plazo de tres años, planeamos ampliar nuestra gama de productos y mejorar la producción. En cinco años, aspiramos a convertirnos en una marca de mobiliario sostenible reconocida.

4. Mercado objetivo

Nuestro mercado objetivo son principalmente personas de entre 18 y 40 años con ingresos medios que valoran el diseño moderno, la durabilidad, la creatividad y la sostenibilidad ambiental.

5. Competencia y ventaja competitiva

Origo S.R.L. compite con empresas de mobiliario tradicionales, personalizadas y sostenibles. Nuestra ventaja reside en la combinación de resina y tejidos reciclados para crear mesas únicas, modernas y respetuosas con el medio ambiente.

6. Equipo Directivo

Nuestro equipo gestionará la producción, el diseño, el marketing, las finanzas y la atención al cliente. La creatividad, el trabajo en equipo y la capacidad de resolución de problemas impulsarán el desarrollo de la empresa.

7. Perspectivas Financieras

Origo S.R.L. controlará los costes de producción manteniendo la calidad. Los beneficios se reinvertirán en producción, nuevos diseños y marketing a medida que la empresa crezca.

En definitiva, Origo S.R.L. combina innovación y responsabilidad ambiental transformando tejidos desechados en muebles elegantes, funcionales y sostenibles.

Company Description Worksheet

Business Name	**Origo S.R.L**
Company Mission Statement	To create stylish, durable, and sustainable tables by combining resin with recycled fabrics, transforming discarded materials into functional and attractive furniture while promoting responsible consumption and reducing waste.
Company Philosophy/ Values	We believe that creativity and sustainability can work together to create products that are both useful and environmentally responsible. Our philosophy is based on innovation, quality, and respect for the environment. By reusing fabrics that would otherwise become waste, we aim to give discarded materials a new purpose and demonstrate that sustainable products can also be modern and stylish.
Company Vision	To become a recognized sustainable furniture brand by creating innovative tables that combine recycled fabrics and resin, inspiring people to choose environmentally responsible products without sacrificing quality or design.
Goals & Milestones	Long-term Objectives a. To develop a successful line of tables made from resin and recycled fabrics that combines durability, functionality, and attractive design. b. To promote environmental awareness by demonstrating how discarded fabrics can be transformed into valuable and useful furniture. c. To establish Origo S.R.L. as a sustainable furniture business focused on innovation and responsible use of materials. Short-term Objectives a. To design and create a functional and durable table using resin and recycled fabrics. b. To apply STEAM concepts such as design, measurement, material testing, and problem-solving during the development of the product.

	c. To document the entire production process, including the materials, tools, steps, and results. d. To test the prototype to evaluate its durability, stability, appearance, and functionality. e. CSR Goal: By the end of our first year of operations, Origo S.R.L. will donate one fully finished Fabreco table to Fundación Saraki, subject to coordination with the organization, to contribute to an inclusive environment and demonstrate our commitment to social inclusion and sustainability. SMART Goal Specific: Donate one Fabreco table to Fundación Saraki. Measurable: The goal will be achieved when one complete table has been produced and officially donated. Achievable: The donation will consist of a product manufactured by Origo S.R.L., making it a realistic contribution that does not require a large additional financial investment. Relevant: The initiative supports our company's values of sustainability, reuse of materials, and social responsibility, while supporting an organization dedicated to inclusion and the rights of people with disabilities. Time-bound: The donation will be completed before the end of the first year of operations.
Target Market	Our target market consists mainly of people between 18 and 40 years old with a middle-income level who are interested in modern furniture and environmentally responsible products. They value sustainability, creativity, and unique designs. Their interests may include interior decoration, furniture, technology, DIY projects, and environmental protection. The product is especially suitable for people who want

	functional furniture with a distinctive appearance while supporting the reuse of materials.
Industry/ Competitors	The furniture industry is a large and competitive market that includes traditional furniture as well as modern and sustainable products. Consumers are increasingly interested in furniture that combines functionality, attractive design, durability, and environmentally responsible materials. A major trend in the furniture industry is the growing interest in sustainability. Customers are becoming more aware of the environmental impact of manufacturing and are looking for products made with recycled, reused, or renewable materials. This creates an opportunity for Origo S.R.L. because recycled fabrics and resin can be combined to create unique furniture pieces. In the coming years, sustainable and customized furniture is expected to continue gaining popularity. Consumers are increasingly interested in products that are different from mass-produced furniture. However, companies may face challenges such as production costs, material availability, and the need to demonstrate the durability and quality of sustainable products. Direct competitors include furniture businesses that manufacture tables using resin, recycled materials, or customized designs. These businesses may already have experience, established customers, and a strong presence in the local furniture market. Indirect competitors include traditional furniture stores and large home-furnishing companies that sell conventional tables made from materials such as wood, metal, glass, or plastic. These companies compete for the same customers even though their products may not focus primarily on sustainability.
Legal Structure/ Ownership	Origo S.R.L. will operate as a Sociedad de Responsabilidad Limitada (S.R.L.), a business structure in which ownership is divided among its

	partners. Each partner's financial responsibility is generally limited to the amount they have contributed to the company. The company will be owned by its partners, who will participate in important business decisions and share responsibilities related to management, production, finances, and marketing. This structure allows Origo S.R.L. to organize its operations while providing protection for the personal assets of its owners.

Estructura Juridica

Origo S.R.L. se constituirá como Sociedad de Responsabilidad Limitada, con un capital social de Gs. 165.000.000, dividido en 165 cuotas iguales de Gs. 1.000.000 cada una, cuyo aporte por socio será de la siguiente manera:

- Socio 1 – Bruce Temperley: 33 cuotas de Gs. 1.000.000 c/u
  Total = Gs. 33.000.000
- Socio 2 – Ezequiel Fariña: 33 cuotas de Gs. 1.000.000 c/u
  Total = Gs. 33.000.000
- Socio 3 – Karen Farres: 33 cuotas de Gs. 1.000.000 c/u
  Total = Gs. 33.000.000
- Socio 4 – Leyla Abou: 33 cuotas de Gs. 1.000.000 c/u
  Total = Gs. 33.000.000
- Socio 5 – Valeria Araujo: 33 cuotas de Gs. 1.000.000 c/u
  Total = Gs. 33.000.000

Total = Gs. 165.000.000

El capital social será integrado en su totalidad en dinero en efectivo.

Esta sociedad tendrá como actividad principal la producción y comercialización de mesas ecológicas elaboradas con materiales reciclados, especialmente residuos textiles mediante el uso de Fabreco, siendo su ubicación de casa central Lambaré, Departamento Central, Paraguay.

Se eligió este tipo de Sociedad por las siguientes características:

- No existe un monto mínimo de capital requerido.
- La responsabilidad de los socios está limitada al monto de sus aportes.
- Permite establecer claramente la participación de cada socio mediante cuotas sociales.
- Es una forma adecuada para una empresa constituida por un grupo reducido de socios como Origo S.R.L.

Products & Services Description

Product/ Service Idea	Our product is a collection of sustainable coffee tables made from industrial textile waste and epoxy resin. The textile waste consists of leftover fabrics generated by clothing and textile factories that would otherwise discarded. This waste contributes to environmental Pollution by filling landfills and increasing the amount of nonbiodegradable industrial waste. By combining these textile scraps with high-quality epoxy resin, we create durable, modern, and attractive coffee tables. Our business follows a Business-to-Consumer (B2C) model because we sell directly to customers who are looking for functional and eco-friendly furniture for their homes or offices.
Special Benefits	The main benefit of our product is that it provides customers with a unique, durable, and stylish coffee table while promoting environmental sustainability. Every table is handcrafted, making each piece one of a kind due to the natural patterns created by the recycled textiles. Environmentally, our product reduces industrial textile waste by giving discarded materials, a second life instead of allowing them to end up in landfills. Our business also promotes social responsibility by supporting the principles of the circular economy, encouraging responsible consumption, and raising awareness about sustainable furniture.

	Customers are likely to choose our product because it combines modern design, quality craftsmanship, and a positive environmental impact.
Unique Features	Our coffee tables stand out because they combine industrial textile waste with transparent epoxy resin to create exclusive patterns that cannot be exactly replicated. Unlike traditional coffee tables, each product has its own distinctive appearance while maintaining excellent durability and functionality. The tables are designed to be practical, aesthetically appealing, environmentally responsible, and long-lasting. They represent an innovative way of transforming industrial waste into valuable furniture that combines sustainability with contemporary interior design
Limits and Liabilities	Although our product offers many advantages, there are some limitations and challenges. The production process requires time because epoxy resin must cure completely before the table can be finished. The resin must also be handled carefully during manufacturing, requiring protective equipment and proper ventilation to ensure worker safety. Some customers may question the durability of furniture made from recycled materials or consider the price higher than mass-produced alternatives. To address these concerns, we will emphasize the product's quality, durability, unique design, and environmental benefits while maintaining strict quality control throughout the manufacturing process.
Production and Delivery	The coffee tables are produced by carefully selecting and cleaning industrial textile waste before arranging it inside custom molds. Highquality epoxy resin is then poured over the textile materials and allowed to cure until it forms a strong, solid surface. After curing, each table is sanded, polished, and assembled with its supporting structure. The finished products will be sold through online platforms, social media, local furniture exhibitions, and direct customer orders. Delivery

	will be carried out through local transportation services or customer pickup, depending on the buyer's preference
Suppliers	Our main raw materials will come from local textile factories and garment manufacturers that produce industrial fabric leftovers. We will purchase epoxy resin, hardeners, molds, finishing materials, and tools from specialized hardware and resin suppliers. Packaging materials will be sourced from local packaging companies that offer recyclable or environmentally friendly options whenever possible.
Intellectual Property Special Permits	Our business will develop its own brand name, logo, and visual identity to distinguish the product in the market. While the coffee tables generally do not require special commercial permits, the manufacturing process must comply with workplace safety regulations because epoxy resin is a chemical material that requires safe handling and proper ventilation. If our brand or product design becomes commercially successful, we may also consider registering our trademark and protecting unique design elements through intellectual property rights.
Product/ Service Description	Our company creates sustainable coffee tables made from industrial textile waste and epoxy resin, transforming discarded materials into modern, durable, and functional furniture. By reducing industrial waste and extending the life cycle of textile materials, our product supports the circular economy while offering customers an exclusive and high-quality design. Each handcrafted table combines innovation, sustainability, and practicality, proving that industrial waste can be transformed into valuable products that benefit both consumers and the environment

Circular Economy

We will apply the Circular Economy by reusing discarded fabrics and transforming them into useful and attractive tables. Instead of allowing old or unused fabrics to become waste, we will give them a new purpose by incorporating them into resin-based furniture. This process helps reduce textile waste, extends the useful life of materials, and creates a product with added value. Our proposal demonstrates how waste can be transformed into a new product instead of being thrown away.

Marketing Plan

- *Market Research*

The survey captures a mature and independent segment capable of making home investment choices: 35.4% are 45 years or older, followed by 29.2% under 18 years, and 23.1% aged 35–44. Occupationally, the sample is balanced between students (35.4%), independent workers/freelancers (32.3%), and corporate employees (16.9%).

Crucially for Origo's validation, 75.4% of respondents have purchased furniture or home decor within the last two years, showcasing an active, high-intent market. When evaluating their buying criteria, customers prioritize functional value: 64.6% rank Quality as the most important factor, followed by Design (18.5%), while only 9.2% prioritize Price and 6.2% explicitly look for Sustainability first.

- *Barriers to entry*

Mention the potential barriers you might encounter when entering to this new market as a company competing with others in the same industry.

Origo S.R.L. may face several barriers when entering the furniture market. One important barrier is competition from established furniture companies that already have loyal customers and greater production capacity.

Another barrier is the cost of materials and production. Although recycled fabrics can reduce some material costs, resin and other production materials can be expensive. The company will also need to ensure that the tables are safe, durable, stable, and have a high-quality finish.

Another challenge is gaining customer trust. Since our product uses recycled materials, some consumers may have doubts about its durability or quality. Therefore, we will need to clearly demonstrate the strength, functionality, and design of our tables.

- *Threats and opportunities*

Threats

Competition from traditional furniture companies and other sustainable furniture businesses.

High or changing prices of resin and other production materials.

Customers may prefer cheaper mass-produced furniture.

Some consumers may have doubts about the durability of products made with recycled materials.

Limited availability of suitable recycled fabrics could affect production.

The company may have difficulties competing with larger businesses that have greater production capacity.

Opportunities

Growing consumer interest in sustainable and environmentally friendly products.

Increasing awareness of textile waste and the importance of recycling.

The possibility of creating unique and customized table designs using different recycled fabrics.

Using social media to promote the environmental benefits and creative designs of the products.

Collaborating with clothing stores, textile businesses, or organizations to obtain discarded fabrics.

Creating a strong brand identity around sustainability, creativity, and responsible consumption.

Expanding the product line in the future to include other furniture or decorative products made with recycled materials.

SWOT Analysis Worksheet

Business areas	**Internal factors**		**External factors**	
	Strengths	**Weaknesses**	**Opportunities**	**Threats**
Product/ Service Offering	Unique coffee tables made from recycled textiles. It follows a circular economy model.	Our material is new, so we'll need to test it to make sure it's durable and water resistant.	People are looking for products with a purpose.	Some customers may prefer cheaper furniture (competitors).
Brand/ Marketing	Our brand stands out because it combines sustainability with modern design.	Since we're a new business, we're not known in the market.	Social media and sustainability campaigns can help us reach customers without spending too much.	Other brands with bigger budgets can attract more customers.
Staff/HR	Our team works well together and everyone contributes different skills.	We have little experience in making and selling furniture.	We can learn new skills from our teachers and feedback from customers.	If a team member leaves or cannot help, the project may be delayed.
Finance	We have tutor's help to finance the project.	Some materials or tools are too expensive.	We can use things we already have	The inflation can affect prices and made more expensive the project.

			for use less money.	
Operations/ Management	We already know us, we are unit and we will work good together.	Normally we are very lazy or unpunctual.	We can learn how to make the product.	We cannot cover demand in a short time because of lack of materials in the market.
Market	We are making something original that the no one in the market is doing.	It can cost money and time to make us known in the market.	We are making sustainable products so people can become more environmentally conscious and, therefore, choose to buy from us.	The product is aimed at a small and demanding group of people.

Can any of your strengths help with improving your weaknesses or combating your threats? If so, please describe how below.

Yes. Our teamwork and our unique sustainable product can help us improve our weaknesses by learning together and creating a high-quality product. Our strong brand idea can also help us compete with bigger companies.

Based on the information above, what are your immediate goals/next steps?

Finish the prototype, test the material, improve the design, create social media pages, and start promoting our product.

Based on the information above, what are your long-term goals/next steps?

Grow our business, sell more products, improve our materials, reach more customers, and become a recognized sustainable furniture brand.

Factors affecting product supply and demand

Material availability, labor, production capacity, and competition can affect the supply of our desks.

Price, customer preferences, trends, advertising, income, and competition can affect demand.

Factors affecting Supply	**Measures to control or minimize its effect**
If there isn't enough recycled fabric (old clothes, scraps), production of tables decrease. 2. If epoxy resin, wood base, or labor becomes expensive, supply decreases. 3. If production is slow (handmade), Supply is limited.	· Partner with clothing stores or donation centers. · Collect fabric from the community · Store extra materials when available. · Use different types of fabric (not just one). · Use low-cost or recycled base materials (like reused wood). · Train workers to reduce mistakes and waste · Buy materials in bulk. · Simplify designs to save time and cost · Use simple tools or machines to speed up cutting and assembling. · Create a production system (divide tasks). · Train workers to be faster and more efficient. · Standardize designs to produce more in less time.
Factors affecting Demand	**Measures to control or minimize its effect**
1. Consumer Taste. 2. Substitutes 3. Price & Product	Regarding consumer tastes, people will be aware of the benefits of the product because it is better for the environment. In terms of substitutes, there are many tables on the market, but ours is ecological and more

	environmentally friendly. Therefore, we can be strong competitors against businesses that are already in the market. If the product is too expensive, fewer people may buy it. To control this, we will keep production costs low, offer discounts or promotions, and explain the product's environmental benefits so consumers can see its value.

- *Product/Service features and benefits.*

Our brand, Origo, offers modern, handmade coffee tables made from recycled textile waste combined with resin and supported by wooden legs. Each table has a unique appearance because of the different textile materials used. The product gives discarded fabrics a second life while creating a functional and attractive piece of furniture. Customers can also benefit from the table's modern design, durability, originality, and the possibility of supporting a more sustainable use of materials.

- *Target customer*

Our target customers are adults and households, especially people interested in buying modern and original furniture for their homes. Based on our survey, the 45+ age group represented the largest percentage of respondents, so this group is an important target market. We also target homeowners and people who value unique furniture and products that reuse materials.

- *For consumers*

Age Range	Between 33-55 years old
Location	Asunción and central department
Type of consumer	Homeowners, families, and people looking for unique furniture
Interests	Interior design, modern furniture, sustainability, and products made from reused materials
Buying behavior	Usually purchases furniture when necessary and looks for products that are functional and attractivee

For businesses

Industry	Cafés, restaurants, offices, hotels
Stage in the business	Established businesses and growing businesses that are furnishing or renovating their spaces
Location	Asunción and central department
Size of business	Small and medium sized businesses
Business need	Functional and attractive furniture that can make their spaces look modern and distinctive

Key competitors

Our company faces key competitors such as MECAL, Plaza Hogar, and Olier, since all three offer furniture products that can be used in homes and other spaces. They are similar to Origo because they provide functional and attractive furniture, including tables and home décor products, giving customers different options when furnishing their spaces.

Origo is different because our coffee tables are handmade using recycled textile waste, resin, and wooden legs. Instead of using only conventional furniture materials, we give discarded textiles a second life while creating a modern and unique product. This combination of functionality, original design, and material reuse helps Origo stand out from its competitors.

Competitor Data Collection Plan

	MECAL	**OLIER**
Price	***Gs 399.000***	***Gs 1.550.000***
Benefits/Features	MECAL offered furniture for bedrooms, kitchens, dining rooms, offices, gardens, living rooms, bars and restaurants. Its products	Olier offered a wide variety of furniture, including tables, sofas, desks, chairs, shelves and bedroom furniture. Quality, design, variety and practicality

	focused on variety, functionality and affordable prices.	were emphasized as important benefits.
Size/profitability	MECAL had multiple branches and offered home delivery, providing broad coverage throughout Paraguay.	Olier had **9 branches** distributed between Asunción, Ciudad del Este and Hernandarias, showing a large regional presence.
Market strategy	MECAL used a website, online catalog, promotions, home delivery, multiple branches and the slogan **"El lado bueno de la vida"** and **"#ESTABARATO"**, emphasizing affordable prices.	Olier used an online store, promotions, financing, corporate sales, after-sales service and multiple physical branches. Its strategy focused on variety, competitive prices, quality and customer service.

Advertising	We will put posters near our store and use Intagram and TikTok to promote our products.	Use digital platforms, catalogs, and promotional materials to showcase its furniture and reach customers.	They use instagram to promote and sell their household items	Olier uses social media, its website, catalogs and promotions to advertise its products and reach a larger number of customers.	2

Positioning/Niche

Our business will focus on customers who are interested in modern, practical, and environmentally friendly furniture. Our niche is people who want unique furniture for their homes while also supporting sustainable products and the circular economy. We will position our coffee tables as stylish and functional pieces made from recycled fabrics and resin, offering a different alternative to traditional furniture. Our main advantage is combining modern design, functionality, and sustainability in one product.

How you will market your product/service

We will mainly use online advertising and social media to promote our product because these platforms allow us to reach our target customers quickly and at a low cost. We plan to use Instagram and TikTok to post pictures and videos of our tables, show the production process, explain how recycled materials are used, and share the final products. We will post content several times a week to keep our audience interested.

We will also use **print marketing**, such as flyers and brochures, especially when presenting the project at school events, exhibitions, or other activities. These materials will include pictures of the tables, information about their sustainable materials, and ways to contact us.

Our marketing strategy will also include **word-of-mouth and referrals**, encouraging customers to recommend our products to friends and family. We will use attractive visual content and

educational posts about sustainability and the circular economy to help people understand what makes our product different. This combination of social media, print materials, and recommendations will help us build awareness of our brand and reach potential customers.

What image do you want to project for your business brand?

Our business wants to project an image that is modern, creative, sustainable, and practical. We want customers to see our brand as a company that creates attractive furniture while also caring about the environment. The use of recycled fabrics and resin will make our products different from traditional coffee tables and will show our commitment to the circular economy. Our brand should communicate quality, originality, and environmental responsibility.

Our logo will have a simple and modern design, using elements related to nature and furniture, such as leaves, recycled materials, or a table shape. The colors and typography will be clean and easy to recognize. Our signage will use the same logo and visual identity so that customers can easily identify the brand.

For interior design and product presentation, we will use a minimalist and modern style, with natural-looking elements and recycled materials whenever possible. This will support our brand because the visual identity will match the sustainable purpose of our products and create a consistent image across our social media, packaging, promotional materials, and physical presentations.

Promotional budget

For Origo S.R.L., our promotional budget includes the main marketing activities and channels we selected to promote the Fabreco table. Our main channels are social media and online promotion, supported by promotional materials. We chose social media because it is an effective way to reach our target market, show the appearance of the table, and communicate its main benefits, especially its use of recycled textile materials. It also allows us to publish photos, videos, and information about the product while communicating directly with potential customers. The online channel complements this by giving interested customers an easy way to

find more information about the product and move from seeing the promotion to making a purchase.

The budget separates our promotional expenses into startup promotional expenses and monthly ongoing promotional expenses. Startup expenses are the costs required to prepare and launch our promotion, including the initial promotional materials and activities needed to introduce the Fabreco table to the market. Monthly ongoing expenses are the recurring costs needed to keep our marketing active, such as continuing social media promotion and maintaining our promotional presence. The main activities included in the budget are the creation and publication of promotional content, online promotion, and promotional materials used to attract customers and explain the product. We selected these activities because they allow us to promote the table consistently, reach customers without relying on expensive traditional advertising, and clearly communicate the product's sustainability, functionality, and value.

Budget structure

- Startup promotional expenses: initial costs required to launch the promotional campaign.
- Monthly ongoing promotional expenses: recurring costs required to maintain promotion each month.
- Main promotional activities: social media/online promotion, promotional content, and promotional materials.

Before startup: Gs. 350,000
Ongoing monthly expenses: Gs. 270,000
Annual sustainability/furniture fair: Gs. 300,000

PROMOTIONAL BUDGET

Use the same media/tools and channels from your Communication Plan. Costs marked as estimates should be confirmed with the provider before launch. Tupi.com.py is included as the online marketplace channel.

Media / Tool	Channel / Means	Action / Description	Budget Type	Cost per Unit (Gs.)	Quantity	Times per Month	Estimated Cost (Gs.)	Source / Cost Evidence

MACRO SUMMARY

Use the totals from this sheet to write your short Promotional Budget paragraph in the MACRO. Explain your startup cost, monthly ongoing cost, and which promotional activities receive most of the budget.

BUDGET SUMMARY	
Before-Startup Promotional Cost	Gs. 345.000
Monthly Ongoing Promotional Cost	Gs. 850.000
Annual Ongoing Promotional Cost	Gs. 10.200.000
Estimated First-Year Promotional Cost	Gs. 10.545.000

Marketing Expenses Strategy Chart

	Target Market 1 Young Adults	**Target Market 2 Families**	**Target Market 3** Conscious Customers
One-Time Expenses	Gs. 100,000 for Instagram and TikTok launch content	Gs. 100,000 for brochures and a digital product catalogue	Gs. 150,000 for sustainable branding, product photography, and informational materials
Monthly or Annual Expenses	Gs. 50,000 for Instagram and TikTok advertisements	Gs. 50,000 for Facebook and Instagram advertisements	Gs. 50,000 for sustainability content and promotion through environmental pages and Gs. 300,000 to participate in a sustainability or furniture fair.
Labor Costs	Gs. 40,000 per month for creating social media content	Gs. 40,000 per month for answering inquiries and preparing	Gs. 40,000 per month for educational content and contacting

		promotional materials	sustainable organizations

Pricing Strategies

Name of the company	ORIGO S.R.L	
Which of the pricing strategies are you using?		
Skimming	**Value Based**	**Cost – Plus**
Origo S.R.L. uses a Value-Based Pricing strategy and proposes a selling price of Gs. 1,600,000 for its Fabreco table. We chose this strategy because the price reflects the value customers can see in a practical, durable, and sustainable table made from recycled textile materials. Our production costs were also considered to make sure the price is realistic for the business and allows us to earn a profit. We considered competitor prices so our product remains competitive and appropriate for our target market, while its sustainable materials and innovative design provide additional value. Therefore, the Gs. 1,600,000 price supports Origo S.R.L.'s positioning as a practical, innovative, and environmentally responsible product.		

Distribution Channel Assessment Worksheet

	Distribution Channel 1	**Distribution Channel 2**	**Distribution Channel 3**
Ease of Entry	**High** Easy to start by taking orders online and arranging pickup or delivery directly with customers.	**Medium-Low** We would need agreements with stores and possibly meet their quality and quantity requirements.	**Medium-High** We would need to register for fairs, prepare the tables, and organize transportation.
Geographic Proximity	**High** We can sell directly to customers in nearby areas and organize local delivery.	**High** Stores already have locations that customers can visit easily.	**Medium** We can only reach customers who attend the event or fair.
Costs	**Low-Medium** Main costs would be packaging,	**High** Stores may charge commissions or require wholesale prices, reducing our profit.	**Medium** Costs could include transportation, event fees, display materials, and setup.

	transportation, delivery, and order management.		
Competitors' Positions	**Medium** Many furniture businesses already sell through online ordering, so competition would be relatively high. However, our recycled textile design would help differentiate the product.	**High** Competition would be high because established furniture brands already have strong positions in retail stores.	**Medium** Competition would be medium, especially from handmade and sustainable product businesses. Our unusual material could attract attention.
Management Experience	**High** We would need to manage orders, inventory, customer communication, payments, pickup, and delivery. This would be manageable for a small business.	**Medium** More organization would be needed to manage inventory, retailer agreements, product quantities, and payments.	**High** We would need to manage transportation, product presentation, sales, and customer service during events.
Staffing Capabilities	**High** One or two people could manage orders, packaging, and deliveries at the beginning.	**Medium** More production and organization may be necessary to maintain stock in stores.	**High** Several group members could help transport, display, explain, and sell the tables.
Marketing Needs	**Medium- High** Social media, product photos, videos, a simple online catalog, and word-of-mouth would help	**High** Advertising could be shared between our business and the retailer, but attractive displays	**Medium** Social media promotion before the event, posters, demonstrations, and information about the

	customers discover the product.	and product information would still be important.	recycled materials would be useful.

For our coffee tables made from glycerin and shredded recycled textiles, we selected direct online sales with local delivery or pickup, combined with sales at design fairs and pop-up events. These channels are appropriate for our target market because customers can easily discover the product, contact us, and purchase directly from our business. Online customers will be able to place an order and choose between pickup or delivery, while fairs will allow customers to see the quality, design, and recycled materials in person. The main advantages are lower distribution costs, direct communication with customers, greater control over pricing, and the ability to explain the sustainable purpose of the product. Some limitations include transportation costs and the need to manage deliveries and orders ourselves. We consider these channels more appropriate than selling through furniture stores because retail stores may require commissions, larger quantities, and more established production capacity.

Plan Operativo

- Producción

  To produce our ecological Fabreco table, we conducted research on the properties and characteristics of the recycled materials selected for the product. This research helped us develop a durable and functional table while giving textile waste a new purpose. The production process consists of preparing the recycled materials, combining them with bio-resin, placing the mixture into a mold, applying pressure, and allowing it to cure until the tabletop reaches the desired hardness and shape.

  For distribution, we will partner with a local delivery company to handle deliveries to customers who place orders through our website and social media channels. This service will allow us to deliver the tables safely and efficiently to customers in different areas. We will also promote and sell our products through social media platforms, allowing customers to contact us and place orders directly.

  According to our cost sheet, we estimate an initial production of **70 Fabreco tables**. Each table will be manufactured using recycled materials and designed for everyday use. Based on our financial calculations, the **manufacturing cost is approximately ₲1,155,000 per table**, while the **sale price is ₲1,600,000 per table**.

- Control de Calidad

  We will maintain consistency with the quality of production by:

  Establishing quality criteria for the Fabreco table, including durability, stability, smoothness, and overall appearance.

Ensuring that the production area and tools are clean and organized before each production process.
Checking the recycled materials before production to make sure they are clean, dry, and suitable for use.
Inspecting the mixture of recycled materials and bio-resin to ensure that it is properly combined and distributed throughout the mold.
Checking that the tabletop is properly pressed and cured to achieve the required hardness and thickness.
Inspecting the finished table to ensure that it has a smooth surface, stable structure, and properly attached legs.
If a defect is detected during the production process that affects the functionality, stability, or appearance of the table, the affected product will be inspected to identify the cause of the problem. The error will then be corrected before continuing production to maintain the quality and consistency of future Fabreco tables.

- Ubicación

Location: Lambaré, Central, Paraguay.

Size: 120 m² with 1 bathroom and 1 main room.

Type of Building: The property is a commercial space in good condition, described as spacious, bright, and adaptable to different types of businesses. It is suitable for Origo S.R.L. because the space can accommodate production, storage, and organization of the Fabreco tables.

Zoning Restrictions: The property is listed as a **commercial premises**, making it suitable for commercial activities. The listing does not specify additional zoning restrictions, so these should be confirmed with the property owner or municipality before starting operations.

Accessibility: The property is located in Lambaré and is positioned at the front of the property, with easy access. Its 120 m² of space provides sufficient room for production, storage, and handling of the tables.

Utilities: The property has **1 bathroom** and an adaptable interior space. The listing does not provide detailed information about electricity or water, so these services should be confirmed with the owner before renting.

Costs: The monthly rental cost is **Gs. 2,650,000**. Additional expenses may include utilities, maintenance, transportation, insurance, and any adaptations required for the production area.

- Entorno jurídico

  Una Sociedad de Responsabilidad Limitada (S.R.L.) es una estructura empresarial en la cual dos o más socios, hasta un máximo de 25, conforman una empresa. Las participaciones se dividen en cuotas iguales de al menos 1.000 guaraníes o múltiplos, y los socios solo son responsables hasta el monto de sus aportes, protegiendo sus patrimonios personales. Es obligatorio que la denominación incluya "Sociedad de Responsabilidad Limitada" o su sigla (S.R.L.); de lo contrario, el gerente responderá ilimitada y solidariamente por las obligaciones sociales.

  Esta figura societaria no puede operar en sectores como banca, seguros o ahorro, a menos que la ley lo exija. Para su constitución, el capital social debe estar totalmente suscripto y al menos un 50% debe ser aportado en efectivo al inicio, completando el monto restante en un plazo máximo de dos años. El capital también puede incluir bienes o activos que, para ser considerados como tales, deberán ser transferidos a nombre de la sociedad.

  Una vez que el contrato social sea inscrito en el Registro Público de Comercio, la sociedad podrá operar legalmente. El proceso de registro incluye una gestión inicial a cargo de un Escribano Público, quien presentará una solicitud firmada por el representante legal ante el juez civil y comercial correspondiente. Este conjunto de requisitos asegura la formalidad y responsabilidad de la sociedad desde su creación.

Tuvimos en cuenta para la formalización cumplir con los siguientes pasos para la apertura de una Sociedad de Responsabilidad Limitada

Trámites para la apertura de una SRL

1. Recurrimos a la Escribanía para la Constitución por Escritura Pública
2. Depositamos el capital en concepto de Garantía en el Banco Nacional de Fomento.
3. Inscripción en Reg. Público de Comercio y en el Registro de personas jurídicas y asociaciones.
4. Publicación de la Constitución de la Sociedad.
5. Inscripción en la Dirección de Apoyo del Ministerio de Hacienda (SET) para obtención del R.U.C.
6. Matrícula de Comerciante.
7. Rubricar los libros contables exigidos.
8. Inscripción Municipal y Solicitud de Patente Comercial.
9. Inscripción Patronal I.P.S.
10. Inscripción Patronal M.T.E.S.S.
11. Registro de Marca D.I.N.A.P.I.

Algunas Obligaciones fiscales

IVA: Impuesto que grava cada fase de comercialización de bienes hasta el consumidor final, solo sobre el valor añadido en cada etapa, con una tasa del 10%, liquidado mensualmente.

IRE: (Impuesto a la Renta Empresarial) grava a quienes operan empresas, tanto individuos como sociedades, con una tasa del 10% sobre las utilidades anuales.

IDU: Aplica a dividendos y utilidades distribuidas, con tasas del 8% para residentes y 15% para no residentes, al momento de su distribución.

Patente comercial: Es un impuesto municipal que deben pagar quienes realizan actividades comerciales, industriales o profesionales.

- Inventario

Hemos optado por mantener un stock mínimo de materiales suficiente para nuestra producción mensual de **70 mesas**, ya que necesitamos contar con las materias primas necesarias para evitar interrupciones durante el proceso de fabricación. Los principales materiales utilizados para la elaboración de nuestras mesas Fabreco son madera, tela reciclada, resina epóxica y catalizador, tornillos y placas de hierro.

Hemos planificado una producción mensual de **70 mesas**, por lo que debemos mantener un inventario de materias primas que permita cubrir esta cantidad de producción. De esta manera, podemos organizar mejor las compras y evitar almacenar cantidades excesivas de materiales.

Cuadro de compras – Producción de 70 mesas

Materia prima	**Cantidad por mesa**	**Cantidad para 70 mesas**	**Costo por mesa**	**Costo total para 70 mesas**
Madera	1 palo de 300 cm	70 palos	Gs. 60.000	**Gs. 4.200.000**
Tela reciclada	300 g	21 kg	Gs. 65.000	**Gs. 4.550.000**
Resina epóxica + catalizador	4 L	280 L	Gs. 1.000.000	**Gs. 70.000.000**
Tornillos/clavos	28	1.960	Gs. 15.000	**Gs. 2.100.000**
Placas de hierro	4	280	Gs. 15.000	—

TOTAL			**Gs. 1.155.000**	**Gs. 80.850.000**

- Proveedores

Según nuestra planificación financiera, Origo S.R.L. trabajará con proveedores locales para adquirir las materias primas necesarias para la fabricación de las mesas Fabreco. Debido a que nuestra producción proyectada es de 70 mesas mensuales, estimamos compras mensuales de Gs. 80.850.000, considerando un costo variable de Gs. 1.155.000 por mesa.

Para facilitar la administración del efectivo y mantener una relación estable con nuestros proveedores, hemos proyectado un plan de pago dividido en dos partes: 50% de la compra será abonado al contado y el 50% restante será abonado a 30 días**.** De esta manera, una compra mensual de Gs. 80.850.000 se divide en Gs. 40.425.000 en el mismo mes y Gs. 40.425.000 al mes siguiente**.**

Management Worksheet -

Bio/s	**General Manager** **Role:** Oversees the company and coordinates the different areas of the business. **Experience:** Student with experience working on school projects, teamwork, organization, and presentations. Responsible for making sure the project stays organized and that the team meets its goals. Marketing Manager **Role:** Responsible for promoting the eco-friendly tables and creating the brand image. **Experience:** Experience with marketing projects, social media ideas, presentations, and identifying the target market. Helps communicate the environmental and modern aspects of the product. Production Manager **Role:** Supervises the design and production of the tables made with resin and recycled fabrics. **Experience:** Experience developing the STEM prototype and researching how recycled materials can be transformed into a useful and attractive product. Focuses on quality, materials, and the production process. Finance Manager **Role:** Manages the company's budget, costs, pricing, and financial planning. **Experience:** Basic knowledge of business finances, costs, pricing, budgeting, and accounting through school business projects.
Gaps in Management or Experience	Because the company is a student-created startup, the team has limited experience with **real-world business operations, large-scale production, professional accounting, and managing a company in the long term**. The team may also need more experience with resin production, supplier management, and professional marketing.

	To overcome these gaps, the company can receive advice from teachers, business professionals, designers, and people with experience in sustainable products.
Advisors	• **Business Advisor:** A teacher or business professional who can provide guidance on management, budgeting, and business decisions. • **Marketing Advisor:** Someone with experience in marketing who can help improve the brand, advertising, and social media strategy. • **Production/Design Advisor:** A person with experience working with resin, recycled materials, furniture, or product design. • **Accounting Advisor:** Someone with accounting or financial experience who can help with costs, pricing, and financial records.

- Balance del día de apertura

  Para la apertura de Origo S.R.L., es necesario considerar las inversiones y gastos esenciales para iniciar las actividades de producción y comercialización de nuestras mesas ecológicas Fabreco. Según nuestro Plan de Inversiones, se han considerado los activos fijos, los costos de producción, los gastos administrativos, comerciales, de apertura y recursos humanos necesarios para comenzar las operaciones.

  Activo fijo: Para iniciar las operaciones contamos con muebles y útiles, equipos informáticos, instalaciones y maquinarias necesarias para la producción. Entre estos se encuentran escritorios, sillas, notebook, impresora, taladro, serruchos, moldes de madera y extintor. El valor total del activo fijo es de Gs. 36.361.000.

  Costo de producción: Para comenzar la producción de nuestras mesas Fabreco se ha destinado un total de Gs. 78.540.000, correspondiente a los costos de producción considerados en nuestro capital inicial.

  Gastos administrativos: Estos incluyen el alquiler del local, servicios básicos, internet, artículos de limpieza, papelería, flete y otros gastos necesarios para el funcionamiento de la empresa. El total mensual de estos gastos es de Gs. 5.982.295. El alquiler del local tiene un costo mensual de Gs. 2.650.000.

  Gastos comerciales: Para promocionar nuestras mesas Fabreco y llegar a nuestro mercado objetivo, contamos con un presupuesto de publicidad y propaganda de Gs. 1.062.916,67 mensuales.

  Gastos de apertura: Para formalizar el funcionamiento de Origo S.R.L. se consideran los honorarios de escribanía y la gestión de inscripción, con un total de Gs. 1.823.700.

  Recursos Humanos: Para cubrir los salarios correspondientes al inicio de las actividades de la empresa se ha destinado un total de Gs. 24.632.113,33.

  Caja chica: Para cubrir pequeños gastos y necesidades inmediatas durante el inicio de las operaciones, se ha destinado Gs. 1.200.000.
