2° A BATAN

Asunción, Paraguay

March to September 2026

Executive Summary

Nutrieté is a student-led company that produces natural and balanced feed for pigs. We created it to offer small farmers a more affordable and healthier feeding option while making better use of agricultural resources.

Our feed contains ingredients such as soy flour, purslane, oregano, rosemary, and cereal residues. Each ingredient has a specific purpose and provides nutrients that can support pig health. We also aim to improve the nutritional quality of pork while keeping our product accessible.

Our short-term goal is to introduce Nutrieté to the local market, gain our first customers, and build relationships with small farmers. In the next three to five years, we plan to increase production, reach more customers, and establish Nutrieté as a recognized Paraguayan brand.

Our main target market is small-scale pig farmers looking for affordable, reliable, and more natural feeding options. We stand out from traditional feeds through our combination of affordability, sustainability, and natural ingredients, including the use of cereal residues to help reduce waste.

Our team of five students works together across different areas of the company. We bring creativity, research, teamwork, and a strong motivation to improve our product.

Nutrieté will use a cost-plus pricing strategy, adding a reasonable profit margin to our production costs. Overall, our goal is to provide small farmers with a practical and affordable alternative while creating a sustainable business with potential in Paraguay.

Company Description Worksheet

Business Name	Nutrieté S.R.L
Company Mission Statement	To provide affordable, high-quality pig feed enriched with natural ingredients that support animal health, protection against bacterial illnesses, and improved meat quality, helping small-scale farmers raise healthier pigs while maximizing the value of their production.
Company Philosophy/ Values	Nutrieté believes that every farmer should have access to affordable, quality nutrition for their animals. Our company values affordability, animal health, quality, innovation, sustainability, and accessibility. We are committed to helping small-scale farmers improve the health and productivity of their pigs while producing high-quality meat at a manageable cost.
Company Vision	To become a trusted and accessible pig-feed brand that empowers small-scale farmers by providing affordable nutritional solutions that support healthier animals, better meat quality, and more profitable livestock production.
Goals & Milestones	Short term: Launch our brand successfully, establish a loyal customer base, and Long term: Position ourselves in the market and be considered a top-of-mind brand, retail our product on multiple locations across the country. Our corporate social responsibility goal is to collaborate with Fundación Saraki, a nonprofit organization by donating 1% of our profits of our first year.
Target Market	Nutrieté primarily targets low-income and small-scale pig farmers who need affordable feed solutions that support both animal health and the quality of their final product. Our product is designed for farmers who want to reduce feeding costs while raising healthier pigs and obtaining better-quality meat.

Industry/ Competitors	Nutrimix, Los Colonos, Raatz
Estructura Juridica	Nutrieté se constituira como Sociedad de Responsabilidad Limitada, con un capital social de 225.000.000 Gs dividido en 100 cuotas iguales de 450.000 Gs cada socio, donde la cuota social fue dividida en 20 cuotas cada socio. El capital social será integrado en su totalidad en dinero en efectivo.

Products & Services Description

Product/ Service Idea	Pork feed with natural aggregates that provide protection against bacterial illnesses.
Special Benefits	Our feed naturally prevents swine bacterial diseases diseases like Enzootic Pneumonia and Colibacillosis, drastically reducing veterinary expenses and the need for costly synthetic antibiotics. Additionally, it eliminates stress-induced aggression and cannibalistic tail-biting by correcting nutritional deficiencies and keeping the animals satisfied. Ultimately, farmers achieve higher meat quality and increased profitability while contributing to environmental sustainability through the reuse of agricultural waste and utilizing reusable bags.
Unique Features	The formula features a blend of purslane, rosemary, and oregano to naturally support the pig's gut barrier and immune system. It also contains high-satiety fermentable fibers and natural tryptophan from soy flour to physically satisfy the pigs and chemically regulate their mood.
Limits and Liabilities	Because Nutrieté relies entirely on natural, organic ingredients without synthetic chemical preservatives, it has a shorter shelf life than heavily processed commercial options.

	Furthermore, our production capacity is closely tied to the seasonal availability and consistent quality of local agricultural byproducts. Finally, while the feed provides powerful preventative immunity, it is a supportive nutritional supplement and cannot fully replace clinical veterinary treatments if the pig is suffering active, severe outbreaks.
Production and Delivery	The manufacturing process is straightforward and highly cost-efficient, allowing us to keep overhead low and easily scale as regional demand grows. To establish immediate brand trust, we will deliver the feed directly to local family farms, regional veterinary clinics, and agricultural cooperatives. Each batch is distributed in reusable bags that customers can come back to refill
Suppliers	We get our cereal waste from "Tu cereal", our soy flour from "AgroMix", and our natural aggregates rosemary, oregano, and purslane from "Vivero Kaavoty".
Intellectual Property Special Permits	We will register the unique brand name Nutrieté and its official logo as our core trademark assets to build professional brand recognition. Our intellectual property protection will also cover the specific, scientifically formulated ratios of our natural aggregates. Additionally, we will secure the necessary sanitary registries and veterinary commercial permits from Paraguayan agricultural authorities to certify our feed as fully safe.
Product/ Service Description	Nutrieté is a sustainable and highly affordable swine feed crafted from recycled organic byproducts and enriched with active medicinal herbs like purslane, rosemary, and oregano. It provides comprehensive protection against common bacterial pathogens while naturally regulating swine behavior, satiety, and stress to eliminate costly aggression and cannibalism. By offering preventative herd care at an accessible price point, it enables resource-constrained farmers in Paraguay to maximize their production value and meat quality.

Circular Economy

A circular economy is a model that minimizes waste and regenerates natural ecosystems by keeping materials in continuous use at the highest utility value. It follows the circular economy model: reduce-reuse-recycle. Its benefits are that it grows the economy without using more resources or damaging the environment.

We will apply circular economy in our project by making cereal waste the base for our product, and by making our packaging reusable.

Marketing Plan

Market Research

Most of our potential customers answered that they are willing to pay the suggested price (45.000 Gs), the majority of them would prefer to buy from a company that promotes sustainability and animal health, and what our customers care about the most is price, nutritional value, and benefits for animal health.

Barriers to entry

Nutrieté has many barriers when entering the market, these include competition from established feed brands, gaining customer trust, high initial production costs, obtaining enough raw materials, and meeting quality and safety requirements. Another challenge is making farmers aware of Nutrieté and convincing them to try a new product instead of the brands they already use.

Threats and opportunities

SWOT Analysis Worksheet

	Strengths	**Weaknesses**	**Opportunities**	**Threats**
	Better health for your pigs	Because its natural it has a shorter shelf life	Spending less money on Veterinary care	It will take time to position our unknown brand
Brand/ Marketing	Brand that connects to customer	We don't have a brand image	We will try a new type of business in this market	People tend to trust known brands
Staff/HR	There isn't a lot of face to face	People like when they	We will be competing with other companies	If the other companies don't

	product selling	can see the owners		advertise its harder to sell
Finance	It is cheap to produce	Limited budget for expansion	People/government may support small businesses	The price of raw materials may increase
Operations/ Management	Easy production process	We depend on suppliers for some ingredients	Production can grow if demand increases	We will be depending on other companies
Market	The product range is small	We can't reach every rural area	The market is large	People are more likely to trust brands they already know

Can any of your strengths help with improving your weaknesses or combating your threats? If so, please describe how below.

Yes, for example, we are cheap and easy to produce, so we can invest more on marketing and get our brand to be more known. Also, because our product improves pig's health, customers may trust more our brand, helping us have a better image.

Based on the information above, what are your immediate goals/next steps?

Our immediate goals are to see if our product works, preventing illness of pigs, and showing to our clients that we are a reliable brand.

Based on the information above, what are your long-term goals/next steps?

Become a trusted brand, expand more our image, and increase production.

Factors affecting supply and demand

Factors affecting Supply	Measures to control or minimize its effect
Insufficient Waste Availability	

Increasing Input Costs Limited Workforce and Low Productivity	Measuring the quantity of waste collected regularly and comparing it with the amount needed for production. Keep track of the cost of raw materials monthly or weekly. Track the number of workers, the hours worked, and the amount produced in a day.
Factors affecting Demand	Measures to control or minimize its effect
Cheaper Alternatives Lack of Customer Trust Limited Product Awareness	Compare with the competition's prices Make costumer surveys, track reviews and complaints. Increase product awareness through social media, promotional campaigns, and direct communication with potential customers.

Product/Service features and benefits.

Natural and balanced pig feed made with soy flour, purslane, oregano, and rosemary. It supports pig health and provides a more sustainable feeding option.

Target customer

Small-scale pig farmers and people looking for affordable and natural pig feed.

For consumers

Affordable feed that helps improve pig health and nutrition.

For businesses

A cost-effective and sustainable alternative to conventional pig feed.

Key competitors

Los colonos, Raatz and Supermix

Competitor Data Collection Plan

	Supermix	Raatz
Price	55.000 Gs	80.000 Gs
Key features and benefits	Balanced nutrition, specialized formulas and supports healthy growth	Quality feed, different formulas for growth stages and supports healthy and weight gain
Market presence	Well known Paraguayan Brand with producers for livestock and pigs	Established Paraguayan brand with a strong presence in animal feed
Market strategy	Focuses on accessible animal feed and different nutrition needs	Focuses on quality and different production stages

Possitioning/Niche

Nutrieté targets low-to-medium-income, small-scale pig farmers in Paraguay who struggle with the rising cost of conventional feed, bacterial diseases, and stress-related aggression. It offers an affordable, sustainable, and preventative alternative by using local organic agro-industrial byproducts and natural additives such as purslane, oregano, and rosemary to strengthen immunity and help prevent diseases like E. coli and respiratory infections. Unlike competitors such as Nutrimix, Los Colonos, and Raatz, which mainly focus on weight gain, Nutrieté also promotes herd health and reduces aggressive behaviors derived from cannibalism. Overall, Nutrieté provides farmers with a cost-effective feed that protects their animals, improves pork quality, and reduces production and veterinary expenses.

Nutrieté aims to build a trustworthy, protective, accessible, and sustainable brand image. The brand will be presented as a preventative daily wellness solution that helps protect pigs from bacterial diseases such as pneumonia and E. coli, as well as stress-related behaviors like tail-biting, while reducing reliance on expensive synthetic treatments. At the same time, Nutrieté will position itself as an affordable and supportive ally for small-scale farmers, showing that quality animal health and better pork production do not have to be expensive. By transforming agricultural byproducts such as cereal residues and soy expellers into nutritious feed, Nutrieté will also stand out as an innovative and sustainable solution that promotes circular farming in Paraguay.

Promotional budget

PROMOTIONAL BUDGET

Use the same media/tools and channels from your Communication Plan. Research or estimate the real cost of each paid activity.

Pricing Strategies

Name of the company	Nutriete	
Which of the pricing strategies are you using?		
Skimming	Value Based	Cost – Plus

We chose the cost-plus pricing strategy because we want our product to be affordable for small farmers while still covering our production costs and making a profit.

Our main product is a natural balanced feed for pigs made with ingredients such as soy flour, purslane, oregano, and rosemary. We created this product to help farmers keep their pigs healthier and also improve the nutritional quality of the pork. Since our target customers include small farmers and people with limited financial resources, keeping the price affordable is very important to us.

To set our price, we calculate how much it costs us to make the feed, including the ingredients, preparation, packaging, and other expenses. After that, we add a profit percentage to get the final price. This helps us make sure we are not losing money while keeping the product reasonably priced.

The price of pig feed can change depending on ingredient prices, production costs, competition, and what farmers can afford. Because of this, we need to compare our price with regular pig feed and make sure our natural ingredients and health benefits give customers a good reason to choose our product.

Distribution Channel Assessment Worksheet

	Veterinary/Agroveternary Stores	Agricultural distributors/Wholeselers	Direct Sales to Pig Producers
Ease of Entry	Requires agreements with veterinary/agricultural stores and meeting their requirements for stocking and selling the product.	Distributors may require consistent supply, competitive prices, storage, and established business relationships.	We can sell directly without negotiating with intermediaries.
Geographic Proximity	Producers can purchase at agricultural and veterinary stores near their farms.	Distributors can transport Nutriete to producers in different areas.	Producers can order directly, but Nutriete would need to organize transportation and delivery.
Costs	Costs include packaging, transportation, and possibly giving the store a commission.	Distributors may require discounts and transportation costs.	No intermediary commission, but Nutriete must cover

			delivery, transportation, and order preparation.
Competitors' Positions	Established feed brands are already available in veterinary and agricultural stores, making this a competitive channel.	Large feed companies may already have relationships with distributors.	Competitors can also sell directly, but we can differentiate through its low price and health-focused benefits.
Management Experience	Requires managing retailer relationships, inventory, orders, and product restocking.	Requires stronger inventory management, contracts, pricing, and coordination with distributors.	Requires managing customer orders, payments, inventory, and delivery schedules directly.
Staffing Capabilities	A salesperson would be useful in maintaining relationships with veterinary stores and explaining the product.	More staff may be needed for sales, logistics, inventory, and distributor relationships.	Requires people responsible for taking orders, preparing bags/bulk quantities, customer service, and deliveries.
Marketing Needs	Veterinarian recommendations can help producers trust the product.	Promotional materials and sales information are needed so distributors understand Nutriete's advantages and can recommend it.	Nutriete would need strong social media, direct communication, demonstrations, and customer education to attract producers.

Pronóstico de Venta de 12 meses/ 12-month sales forecast

Para la proyección de nuestras ventas hemos tenido en cuenta el punto de equilibrio que fue de 5815 unidades, además hemos estimado un aumento en las ventas mensuales en una escala de 5 unidades por mes y el precio estimado para la comercialización es de 45.000 Gs. por unidad. Esta proyección nos sirve para conocer los posibles ingresos que tendría la comercialización de nuestro producto.

Presupuesto de Ventas			
N°	**Producto o Servicio**	**Proyección de Ventas**	
		Mensual en Gs.	Anual en Gs.
1	**Balanceado Porcino**		

	Cantidad Vendida	5.815	70.110
	Precio x Unidad	45.000	45.000
	Total Gs.	**261.675.000**	**3.154.950.000**

En el siguiente cuadro presentamos las ventas por el mes de Enero y total por el periodo de un año.

Plan Operativo

Producción

Se introducen los ingredientes, los cuales incluyen residuos de cereal, harina de soja, verdolaga, orégano y romero, a la maquina peletizadora, de donde salen los pellets de igual tamaño. luego, son guardados en nuestro empaque, hecho de plástico polipropileno.

Control de Calidad

Se limpiará la maquina peletizadora después de cada uso, para asegurarnos de que las cantidades no sean alteradas para cada tanda. Se controlará el tamaño de los pellets y su estado antes de ser empacados. Finalmente, se corroborará si el empaque está en condiciones óptimas para la distribución, es decir, sin roturas o errores de impresión.

Location

Nutrieté will be located in San José Obrero, Cordillera, where we will rent a 204 m² warehouse with 17 meters of front and 12 meters of depth. The rent will be Gs. 4,400,000 per month. The facility will be used for production, storage, and direct sales.

The warehouse has water, electricity, and three-phase electricity, which will be useful for our production equipment. It also has an office, a bathroom, natural lighting, three wind

turbines, and two exhaust fans, providing good ventilation for our production and storage areas.

Our main point of sale will be the production facility in San José Obrero. Farmers will be able to buy Nutrieté directly from us, allowing us to have direct contact with our customers and explain how our product works.

To reach more customers, we also plan to sell Nutrieté through agricultural and veterinary businesses such as Agroveterinaria Asunción S.R.L., Agrofield, and Profarco S.A. These businesses already serve farmers and livestock producers, making them good places to introduce our product.

We will also participate in farmers' markets, community fairs, and local events in Cordillera. These spaces will allow us to show our product, explain its benefits, and interact directly with potential customers.

Entorno jurídico

Empresa formada bajo el régimen de Sociedad de Responsabilidad Limitada (S.R.L.) Es un tipo de empresa formada con la sociedad de cinco socios, donde la participación de los mismos se divide en 100 cuotas iguales por valor de 450.000Gs cada uno. La cantidad de socios no podrá ser mayor de 25 (veinte y cinco). Todos los socios responden ante las obligaciones sociales sólo hasta el valor de sus aportes.

> La denominación social debe llevar los términos "Sociedad de Responsabilidad Limitada" o su sigla (S.R.L.). Su omisión hará responsable ilimitada y solidariamente al gerente por los actos que realice en esas condiciones.

Esta sociedad no está habilitada para realizar operaciones bancarias, de seguro, de capitalización y ahorro, ni aquellas para las cuales las leyes exijan otra. El capital social debe estar totalmente suscripto y por lo menos el 50% debe estar integrado en dinero efectivo, completándose la integración en un plazo no mayor de dos años.

No hay requisito de capital mínimo pero éste debe ser suficiente para cumplir con el objeto que se proponga la SRL.

El capital social puede ser incorporado también en especie o en activos fijos, que deberán ser transferidos a nombre de la sociedad en el documento de constitución o bien una vez que el contrato social haya sido inscripto en el Registro Público de Comercio. Los socios continúan siendo responsables solidariamente ante terceros por el valor de los bienes y activos en especie incorporados como capital.

La S.R.L. podrá operar una vez que el contrato social haya sido inscripto en el Registro Público de Comercio, previa protocolización.

El proceso de gestión o administrativo resulta en un pedido realizado por el Escribano Público quien presentará una nota firmada por el representante legal de la Sociedad al Juez de Turno en lo Civil y Comercial.

Tuvimos en cuenta para la formalización cumplir con los siguientes pasos para la apertura de una Sociedad de Responsabilidad Limitada

Trámites para la apertura de una SRL

- Recurrimos a la Escribanía para la constitución por es Pública.
- Depositamos el capital en concepto de garantía en el Banco Nacional de Fomento (BNF).
- Inscripción en el Registro Público de Comercio y en el Registro de Personas Jurídicas y Asociaciones.
- Publicación de la Constitución de la Sociedad.
- Inscripción en la DNIT para la obtención del R.U.C.
- Obtención de la Matrícula de Comerciante.
- Rubricación de los libros contables exigidos.
- Inscripción Municipal y solicitud de Patente Comercial.
- Inscripción Patronal en el I.P.S.

- Inscripción Patronal en el M.T.E.S.S.
- Registro de la marca en D.I.N.A.P.I.
- Inscripción y habilitación ante SENACSA.
- Registro y habilitación ante INAN.
- Obtención de permisos ambientales ante MADES.

Algunas Obligaciones fiscales

- IVA: es un impuesto que grava cada una de las fases de la comercialización del bien hasta que llegue al consumidor final, pero no grava el importe total de cada venta en forma independiente sino como su nombre lo indica, exclusivamente sobre el valor añadido en cada etapa por cada agente económico. Se liquida mensualmente y se determina por la diferencia entre el débito fiscal y crédito fiscal. Tasa: 10%
- IRE: Es la abreviatura que se utiliza para referirse al Impuesto a la Renta Empresarial. Es un Impuesto establecido por ley, para aquellas personas que se dediquen a la realización de actividades en forma de empresas, ya sea a través de un particular o una sociedad. Su liquidación se hace luego de terminado el año. Tasa: 10% sobre la utilidad antes de impuestos
- IDU: gravará las utilidades, los dividendos o los rendimientos, puesto a disposición o pagados a personas físicas o jurídicas residentes o no. Se liquida al momento que se decida la distribución de los dividendos o utilidades. Tasa: 8% para residentes y 15% para no residentes
- Patente comercial: este tributo se abona a la municipalidad donde se encuentre la propiedad que se alquila. Es un impuesto que debe pagar todo aquél que desee ejercer o ejerza una actividad lucrativa, ya sea industrial, comercial o profesional. El mismo se aplica tanto a personas naturales que inician una actividad, como a empresas.

Personal

	Production manager	**Accountant**	**Community Manager**
Job responsibilities	- Supervise and manage production of the feed in the production center - Train and supervise the assistant - Making sure of maintaining the good quality	- Assists accounting on anything needed - Prepare file tax declaration. -Gives us financial reports monthly on the company	- Management of Social Media profiles. - Gets us strategic advertising in agricultural events - Set, plan, and implement social media and communication campaigns and strategies
Duties	- producing the feed for pigs - Check the products before packing and following the standard procedure Manage the inventory	- Assists accounting on anything needed	- Build relationships with customers, industry and professionals - Organize and manage events to boost brand awareness - Responds to customers.
R/P Education	Bachelorette degree on animal nutrition or related	Graduate on accounting	College student or graduate with a Marketing, social media or Communications degree.
R/P Experience	Previous Job experience is preferred but not required, we would like to give job opportunities to young workers with working spirit. The applicant must be efficient and effective. Other :	- Flexible Working hours - 1 hour lunch breaks - 5 days a week, not on weekends	- Flexible Working hours - working as needed	- Flexible Working hours - 1 hour lunch breaks - 5 days a week, not on weekends.

Inventario

La materia prima que necesitamos para la elaboración de nuestro producto es de fácil adquisición y es por ello que hemos optado por mantener un stock mínimo de 10 unidades por mes. Nuestro producto no necesita de refrigeración, pero si de un almacenamiento que cumpla con los estándares de higiene y salubridad.

Teniendo en cuenta que la materia prima posee buena disponibilidad y siendo un producto orgánico y natural, hemos planificado una producción mensual de tal forma a no necesitar contar con un stock de materia prima muy alto. Nuestro producto una vez listo tendrá un vencimiento de 1 a 2 meses en condiciones ideales, pero 1 mes o menos si hay humedad o esta abierto ya. En el siguiente cuadro proyectamos las compras de materia prima e insumos por el periodo de 1 año.

PRESUPUESTO DE COMPRA DE MP E INSUMOS						
MP/INSUMOS	Verdolaga	Oregano	Romero	Harina de soja	Cereal	Bolsa
CANTIDAD	70.120	70.120	70.120	70.120	70.120	70.120

TOTAL	1.308.859.920	56.727.080	106.862.880	841.440.000	163.589.960	175.300.000

Proveedores

Según la investigación en el sector industrial es común conseguir financiamiento es por ello que hemos proyectado un plan de pago a crédito siendo una referencia abonar el 40% al contado y el saldo a 30 días. O de igual forma podríamos conseguir un préstamo bancario. En el siguiente cuadro proyectamos un plan de pago a los proveedores.

Política de crédito

Las ventas se realizarán principalmente al contado, mediante efectivo, transferencias bancarias u otros medios de pago disponibles. Para clientes habituales y con buen historial de pago, la empresa podrá ofrecer financiación a corto plazo, otorgando créditos con un plazo máximo de 30 días. Esta modalidad permitirá facilitar la compra del producto sin comprometer significativamente el flujo de efectivo de la empresa.

Bio/s	Dora (CEO): Leads the company and oversees all departments. Responsible for strategic decision-making, coordinating the team, and ensuring that Nutrieté achieves its business goals. Alexia (Department Manager): Coordinates departmental activities and ensures that tasks are properly organized and completed. Supports communication between departments and helps implement the company's strategies. Fernanda (Production Department Manager): Oversees the production process, including ingredients, feed preparation, quality control, and efficient use of resources. Ensures that Nutrieté's product meets the company's quality standards.

	Enzo (Administration Department Manager): Manages administrative and financial activities, including budgeting, costs, records, purchasing, and resource management. Helps ensure the company operates efficiently.
MM	Our main management gaps are professional experience in animal nutrition, large-scale feed production, veterinary regulations, and business operations. As students developing a new product, we also have limited experience with real-world agricultural markets, distribution, and financial management.
Advisors	Veterinarian: Provides professional recommendations regarding pig health, product safety, and the effectiveness of the natural ingredients. Accounting teacher: Provides guidance on pricing, budgeting, costs, and long-term financial business planning.

Organization Chart

Gastos Iniciales y Capitalización

Gastos de puesta en marcha

1. Para la puesta en marcha de nuestra empresa necesitamos:
2. Abonar los gastos correspondientes a la apertura y formalización de la empresa.

3. Alquilar un inmueble cuya ubicación se encuentre dentro del Departamento Central, que cuente con el espacio y las condiciones necesarias para la elaboración y almacenamiento de nuestro producto.
4. Comprar bienes del Activo Fijo como escritorios, sillas, mesas de trabajo, estantes y utensilios necesarios para la producción. Además, necesitamos invertir en instalaciones y adquirir maquinarias para la elaboración de nuestro balanceado, como hornos deshidratadores industriales y peletizadoras.
5. Comprar los insumos necesarios para iniciar la elaboración de nuestro producto, como cereales, soja, verdolaga, orégano, romero y los demás ingredientes que forman parte de nuestra fórmula.
6. Adquirir los materiales necesarios para el envasado y comercialización del producto.
7. Contar con los permisos y habilitaciones necesarios para la elaboración y comercialización de alimentos balanceados para animales.
8. Destinar un presupuesto inicial para publicidad, promoción y distribución de nuestro producto.

Cálculo del punto de equilibrio: 5815 Unidades

Fórmula del punto de equilibrio

PE = Costos fijos / (Precio por unidad – Costo variable por unidad)

$$\frac{41.682.480}{45.000 - 37.833} = 5815 \text{ UNIDADES}$$

Uso del capital

El proyecto será financiado 100% con fuente propia. A continuación se presenta el cuadro de la inversión total.

Costo del servicio	132.222.840	-	
Imprevistos	359.846	-	
Inversión total en Gs.			**233.000.000**

Nuestra Inversión total es de Gs. 233.000.000 que se compone de:

a. Activo Fijo que son los bienes que necesitamos para el funcionamiento de nuestro negocio.
b. La inversión preoperativa se da por los gastos que genera la formalización de la empresa como la escritura de constitución, y los demás tramites en las diversas instituciones.
c. El capital de trabajo es básicamente los recursos financieros que la empresa necesita para continuar funcionando y realizar sus actividades. El capital de trabajo es una herramienta que asegura que el negocio continuará operativo, incluso enfrentándose a una escasez de recursos para pagar sus gastos básicos, y es por eso que es crucial para cubrir los gastos operativos y los costos de producción.
